

Explanation of attached Parking Management Plan document

In 2020, the Newton Centre Minyan commissioned a parking management plan to explain how its parking needs at that time could be accommodated without imposing an undue burden on the surrounding neighborhood.

The Centre Street Minyan is approximately half the size of the Newton Centre Minyan, and needs fewer stalls beyond those that are available on-site at 858 Walnut Street. The 2020 parking management plan is attached simply to document that there are 22 parking stalls along Walnut Street between Commonwealth Avenue and Homer Street, that are in easy walking distance of 858 Walnut Street, and would easily accommodate those who cannot be accommodated on-site.
