Subject: RE: Docketing Embodied Carbon piece

Good morning,

I agree that this can be docketed directly by the Directors of Sustainability and/or with Director of Planning...

Best,
Zack

Carol,

Please Docket this item for ZAP, using the title provided in bold

Ordinance to regulate embodied carbon in new construction

Councilor Crossley, on behalf of the Climate & Sustainability Team, requesting a discussion with the Sustainability Team and Planning Department, and to amend the zoning ordinance (Section 5.13, notably 5.13.4.D Reserved) to regulate embodied carbon in large new construction, to further the objectives of the city's Climate Action Plan.

Hi Deb and Planning folks,

Thanks Deb for docketing this item on behalf of the Climate & Sustainability Team. Zack, Cat, and I had talked about if we needed to make this slightly broader to allow for bits of the language to be edited outside of 5.13.4.D, as I could see pieces of the requirements fitting in at other subsets of 5.13. I made some tweaks with that in mind, please edit further as you see fit.
