Detectable levels of certain metals, PAHs and vinyl chloride were all fully evaluated under conservative assumptions and determined to fall below the applicable Prop. 65 No Significant Risk Level (NSRL).

In addition, the average concentrations of detected metals in TURF GREEN 4090 were below limits set under the EU Toy Safety Directive and the US EPA's Regional Screen Levels for residential soil.

Accordingly, Westlake's TURF GREEN 4090 meets all applicable safe harbor limits for Prop. 65 listed substances and triggers no reasonable warning or labeling requirement under the rule.
