Street Trees and Tree Canopy Program - \$250,000

We know trees provide beauty and make Newton more livable, improve air quality, help stormwater runoff, and reduce temperatures in hot weather. We will use ARPA funds to help revitalize our tree canopy through strategic planting and care of young trees, identification and removal of dangerous trees, and stump removal and grinding. Funds will also be used to purchase a new watering truck that will be designed and built specific to the tasks of tree planting, watering, tree mulching, and young tree care.
