Owner's Address: _____

Owner's Telephone #: _____ State: _____

All Fire Protective Systems must be maintained and serviced according to all applicable NFPA, State and local regulations. All systems must have a maintenance contractor/authorized agent who will respond, within two (2) hours of activation of the system and restore said system to normal conditions according to authority having jurisdiction guidelines. The owner will immediately notify the Newton Fire Department of any change of maintenance contractors, as required in local codes. The Newton Fire Department has the permission of the owner to notify the authorized agent at any time of an activation of the system, so that the two (2) hour response may be adhered to. The owner shall provide access keys to the maintenance contractor to meet the two (2) hour response window. The owner's signature to this form designates agreement to the above stated conditions and the authority of the authorized agent to make necessary changes to comply with all Fire Department requirements.
