LEAD PAINT INSPECTIONS AND CERTIFICATES OF COMPLIANCE

The Massachusetts Department of Public Health Regulations for Childhood Lead Poisoning Prevention Program (CLPPP) requires that properties, where children under the age of six (6) reside, be tested for the presence of lead paint and if found in violation be brought into compliance. Questions can be directed toward CLPPP at 800-532-9571.

Owners of single family dwellings that are owner occupied can contact a private lead paint inspector. The City of Newton does not issue certificates of compliance. Only a licensed lead inspector can issue a Letter of Full Deleading Compliance.

Homeowners may contact the Code Enforcement Inspector at the Health and Human Services Department for further information or visit the state website: <http://www.mass.gov/eohhs/gov/departments/dph/programs/environmental-health/exposure-topics/lead/>
