

Operation Save Newton's Nature

Three 6th graders from F.A. Day, Jackie Reale, Sharmeen Kashif and Riley Keblin are extremely passionate about nature so when their school got involved with a project where students take action in one of the United Nations global goals which are 17 goals for a better world by 2030. They picked goal #15 life on land which is a goal to protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

So, their idea was that they could put up posters around places in Newton that have a lot of litter, the posters would say if anyone sees any trash on the ground they should pick it up and throw it away. Underneath or close by the poster would be a trash can so when people read the poster and see any litter they will have somewhere to throw it away.

The idea is that by putting up posters around Newton they could actively raise awareness on this issue so people could support our beloved environment and help our city become more environmental friendly.

They call their project "Operation Save Newton's Nature" (OSNN) you may see their posters displayed around, please help spread the word and save Newton's nature which intern helps save the environment; a cleaner Newton is up to you.
