## **“Fall Is a Great Time to Plant for Bees and Butterflies!”**

### **COURSE DESCRIPTION:**

It’s fall, and bees and other beneficial insects, and birds still need the food and energy that native perennials provide. Learn how “intentional gardening” with native plants benefits us all. Design and plant a “pop up” biodiverse meadow filled with hardy, drought-tolerant perennial native plants that sustain pollinators, absorb rainwater into the soil, and trap carbon. Find out how you can do something positive and affordable for the environment and your community by applying what you learn to *your own backyard!* BEE inspired and leave with plant lists and design ideas.

Join us for a 4-hour program. Native plants, tools, gardening gloves furnished by Friends of Kennard Park. Physical work. Wear old clothes because you’ll get dirty! Bring your own lunch and drink.

**When:** Sunday, October 14, 2018, from 10 am – 2:00 pm

**Where:** Kennard Park, 246 Dudley Rd, Newton, MA 02459.

**Course fee:** \$75 per adult; \$40 per child

**Register on-line:** [www.activityreg.com](http://www.activityreg.com)

**Questions:** email, [parks@newtonma.gov](mailto:parks@newtonma.gov), or call 617-796-1510
