

NEVER LEAVE PETS IN A CAR!

VEHICLE TEMPERATURES

OUTSIDE	INSIDE	TIME TO REACH
75	100	10 minutes
75	120	30 minutes
85	90	5 minutes
85	100	7 to 10 minutes
85	120	30 minutes
100	140	15 minutes

A Few More Hot Weather Tips for Pet Owners!

- Pets can get dehydrated quickly, so give them plenty of fresh, clean water when it's hot outdoors.
- Make sure your pets have a shady place to get out of the sun, be careful to not over-exercise them, and keep them indoors when it's extremely hot.
- Know the Warning Signs - symptoms of overheating in pets include excessive panting or difficulty breathing, increased heart and respiratory rate, drooling, mild weakness, stupor or even collapse. They can also include seizures, bloody diarrhea and vomit along with an elevated body temperature of over 104 degrees.
- Animals with flat faces are more susceptible to heat stroke since they cannot pant as effectively. These pets, along with the elderly, the overweight, and those with heart or lung diseases, should be kept cool in air-conditioned rooms as much as possible.
- When the temperature is very high, don't let your dog linger on hot asphalt. Being so close to the ground, your pooch's body can heat up quickly, and sensitive paw pads can burn.
