

Contact Information for Meter Distributors

*In addition to purchasing the meter, please be advised you may also need a ¾" by 1" brass adapter valve (meter union to meter union). The City does not provide this piece. The adapter can be purchased at Tisaless, Stiles, and most plumbing supply companies.

Phone Number: 781-769-2400

- When water meters are installed on conductive piping (copper, brass, steel, etc..) the piping is required to be bonded (connected) around the insulated joints. (Example: the meter) per 527 cmr 12:00 2014 Massachusetts Electrical Code. Article 250.53 Grounding Electrode Installation. 250.53(D) (1) Continuity. Continuity of the grounding path or the bonding connection to interior piping shall not rely on water meters or filtering devices and similar equipment. This requirement can be achieved by licensed electrician installing a wire around the new meter with two clamps.
