Interests & Experiences

Please tell us about yourself and why you want to serve.

Why are you interested in serving on a board or commission?

Please allow me to introduce myself. I am a resident in Newton for the last five years living with my wife and two children. My daughter attends Brown Middle School and my son is at Walnut Park Montessori School. Recently, I became aware of the Netflix show, "13 Reasons Why" through Brown school and was curious to find out about the policies in place in Newton. Through this search, I came across the HHS Council and realized you were actively discussing the topic. Reading through the minutes, I also became aware of several other initiatives that your group has rolled out. This has prompted me to apply for this position as the agenda is passionately close to my heart. I was trained as a Scientist at Rutgers and Harvard Medical School in the past and have worked at Novartis pharmaceuticals in Cambridge, MA. Currently, I am Founder & CEO at Nivarta, Inc., a biopharmaceutical company that is developing therapeutic drugs to treat metabolic disorders such as diabetes, obesity and rare fat disorders. Given my background in health sciences, I strongly feel that I can contribute to the broader cause of community health well being by becoming part of the HHS Council. Henceforth, please guide me through the process of joining HHS Council and serving the community. Thank you very much for your time and anticipated consideration.

MURALI VEMULA, PH.D.

In my current role as Founder & CEO at Nivarta, Inc., I am leading the efforts to develop a protein therapeutic to treat rare diseases and NAFLD/NASH and identify novel therapeutic targets that are involved in gastric bypass surgery mediated diabetes remission. In the past, I have significant experience in target discovery & validation of druggable targets involved in diabetes, obesity, cystic fibrosis, and neurological disorders using cell/molecular biology and bioinformatics methods. I have conducted detailed literature review and evaluated development opportunities from mechanistic, pharmacological, and clinical perspectives. Honorable City Council
Newton City Hall
1000 Commonwealth Avenue
Newton Centre, MA 02459

Councillors:

All of us are watching the evolving COVID-19 situation closely and, understandably, we're all concerned.

Here in the City of Newton, I am working closely with Deb Youngblood (Commissioner of Health and Human Services), Bruce Proia (Acting Emergency Management Director), Michelle Pizzi O'Brien (Human Resources Director), and many others to maintain a safe workplace, to adopt practices protecting the health of all our employees and to help employees if they are impacted by COVID-19 even as we ensure the continuity of municipal operations.

City of Newton Department Heads are also working with City of Newton Health and Human Services to develop specific protocols for their individual Departments. Examples include providing N95 masks for first responders when necessary, making hand sanitizer/wipes available, placing signage about handwashing in public view, and additional steps by our custodians to disinfect our work sites.

With this in mind and out of an abundance of caution, I respectfully submit a docket item to your Honorable Council requesting authorization to appropriate and expend up to \$250,000 from June 30, 2019 Certified Free Cash for the purpose of being prepared to act, should the need arise. Funds should be appropriated to Acct # 0121030-543500 Emergency Operations – Supplies. We will carefully track utilization of these funds and will keep your Honorable Council apprised.

Thank you for your consideration of this matter.

Sincerely,

 Note: Activation may take up to 1 1/2 hours

IMPORTANT NOTES

1. Please confirm that the design voltage listed above is accurate for this facility. Design voltage/phase is defined as the voltage/phase being connected and utilized at each lighting pole's electrical components enclosure disconnect. Inaccurate design voltage/phase can result in additional costs and delays. Contact your Musco sales representative to confirm this item.
2. In a 3 phase design, all 3 phases are to be run to each pole. When a 3 phase design is used Musco's single phase luminaires come pre-wired to utilize all 3 phases across the entire facility.
3. One contactor is required for each pole. When a pole has multiple circuits, one contactor is required for each circuit. All contactors are UL 100% rated for the published continuous load. All contactors are 3 pole.
4. If the lighting system will be fed from more than one distribution location, additional equipment may be required. Contact your Musco sales representative.
5. A single control circuit must be supplied per control system.
6. Size overcurrent devices using the full load amps column of the Circuit Summary By Zone chart- Minimum power factor is 0.9.

RE: 140 Brandeis Road, Request for Determination of Applicability

Project summary

- Install 4 field light poles at the currently unlit Newton South High School field, with related trenching for electrical wiring.
- Work within the buffer zone is limited to the installation of the bases for 2 of the light structures and the trenching associated with the necessary electrical conduit.
- Erosion controls are proposed to be installed between the proposed lights and the resource area.

Approved plans

- "Electrical Site Plan E1.01" prepared by Richard Alexy (1/12/20)
- "Illumination Summary (wetlands grid)" prepared by Musco (11/11/19)
- "Newton South High School Football/Soccer Lighting Design" by Musco (10/4/19)

Dear Mr. Perez-Demorizi:

Enclosed is the Newton Conservation Commission's Determination of Applicability under the Wetlands Protection Act, MGL Ch. 131, s. 40 and the Newton Floodplain/Watershed Protection Ordinance, Section 22-22. The Determination is "Negative-Conditional", i.e., the Commission has determined that by following the referenced plan(s) and the following mandatory conditions listed below, no adverse alteration of the wetland resource area will occur and so no further wetland filing is needed.

- The applicant must schedule and attend a pre-construction site visit to check erosion controls.
- All spoils from trenching and auguring must be properly disposed of off-site.
- Concrete for the footings must be mixed on site to reduce waste. Any excess concrete must be properly disposed of off-site.
- Any concrete washout must occur outside the 100' buffer zone.
- All disturbed areas must be fine-graded, loamed, and seeded to ensure permanent stabilization.

If you have any questions regarding this Determination, please contact me.

Sincerely,

Claire Rundelli
Assistant Environmental Planner

B. Determination

Pursuant to the authority of M.G.L. c. 131, § 40, the Conservation Commission considered your Request for Determination of Applicability, with its supporting documentation, and made the following Determination.

Project Description (if applicable):

The scope of work at the Newton South High School Field encompasses the retrofitting of the unlit field with new high efficiency lighting that will help extend the playability of the fields. Excavation occurring on the WPA jurisdiction involves digging the light pole foundations and trenching associated with the installation of new electrical conduit. The lighting proposed at the fields has been designed for the least possible spillage.
