Sent from my iPad. I am a residents of 280 Boylston St.I am concerned about the Lab that will be dwelling in the building next to ours.I Want to know exactly if the materials in the lab would be harmful etc live virus .Medical labs belong in medical areas ,such as Longwood Ave Boston.Not in residential areas.I want to convey that I am not happy about a lab of this nature being in a building that abuts my residence.
