Subject: The Atrium

I am writing this because you are my Alderman.

I plan to attend the Public hearing on Tuesday Feb 3, 2015 because I am very worried about the Possible new Tenant at the Atrium. From my kitchen window at Imperial Towers, I look directly into the Atrium. I watch window installation, men working inside the building and hear the noise. The Atrium lost potential medical occupants when Wegman's built new medical & physical buildings.

Now The Atrium is planning to install Recombinant DNA Laboratories, have 400 employees and make traffic denser than it currently is.

I am very worried about Bacteria & Health risks.

Who is overseeing this operation?

What type of waste is being produced, and how will it be disposed of?

They say they have safeguards, and will have security. What are they? Can you enforce them?

When I read about annual inspections- how health inspectors are appointed and see their terms of office it is incomprehensible to me that the Garden City will sell itself short because they want to save this new building under reconstruction because they have no other offers to use it. .

I have read The Newton Charter and the City of Newton Regulations from 1980. Do we want old rules to change our values?.

Please do not allow the destruction of the City you serve.
