

Dear Linda,

As a Waban and Quinobequin resident, I am vitally concerned over the increase in traffic that may well occur from the proposed Riverside project. The road was built as a secondary and recreational road and as such can not adequately handle the kind of traffic I suspect will occur from the proposed project. I would like to suggest that action be taken to assess the situation untenable increase in amount and speed of traffic on this road due to already built projects. Thank you for your concern and attention
