

Dear Newton Resident,

Newtonians are all for reducing our greenhouse gas footprint, saving money and making our homes more comfortable.

In Newton, 59% of the City's greenhouse gas emissions come from residential buildings and passenger vehicles. That's why the City of Newton has partnered with Eversource and National Grid to offer you expertise and financial incentives to **help us reduce our greenhouse gas emissions, lower our utility bills, improve our indoor air quality, and better control the temperature of our homes.** This is a win-win-win-win!

A useful step toward creating a cost-efficient, comfortable, and climate-conscious home is to get a safe **no-cost virtual Home Energy Assessment** from Eversource and National Grid, sponsors of Mass Save®. This comprehensive energy assessment will evaluate your heating, cooling, insulation, and more to help you better understand your current energy use. You may receive **no-cost energy-saving devices** such as low-flow showerheads and programmable thermostats.

You will also receive a customized report with information about **further actions you can take and the Mass Save financial incentives available** to make those actions easy and affordable. After your Home Energy Assessment, you'll also be eligible for incentives such as at least 75% off approved insulation upgrades, 0% financing for insulation, and heating, cooling, and hot water equipment. The City of Newton encourages everyone to take the next steps and make the following investments in their homes to "use less and green the rest":

- Insulate to the Max
- Update Heating & Cooling
- Electrify Your Ride
- Go Solar

Go to the City's Take Action webpage at tinyurl.com/actions-you-can-take to learn more about these four actions or schedule your no-cost virtual Home Energy Assessment today by calling **1-866-527-SAVE**.

Sincerely,

Ruthanne Fuller, Mayor

Eversource and National Grid are proud sponsors of
