FORM 3 – NOTICE OF INTENT – NARRATIVE

5 HAGEN ROAD FENCE REPLACEMENT PROJECT

JUNE 3, 2021

During the past few years, several sections of the fence that runs along my property on the Parker Street side, as well as sections that turned the corner from Parker Street and ran along my rear boundary, have fallen down due to damage sustained from storms and rot in the posts accumulated over time.

This proposal is simply to replace those sections and some others before they, too, succumb to the same fate.

I propose to replace approximately 50 linear feet along the Parker Street boundary, beginning approximately 25 feet south of Hagen Road and approximately 24 linear feet along the rear boundary.

The fence itself is constructed in the tongue-in-groove style and all sections will be 6 feet high.

I understand that there are conservation concerns and I propose to have the fence installed along the Parker Street boundary approximately 2 inches off the ground and the fence installed along the rear boundary installed 4 inches off the ground, in both cases having concern for water and small animals to run freely.
