

Mayor Ruthanne Fuller and the City of Newton present Newton HeatSmart and CoolSmart Project

Investing Now for
Newton's Future

Newton received a grant from the Massachusetts Clean Energy Center to encourage residents to adopt heat pump technology for heating, cooling, and hot water. Under the program, the City vetted heat pump installers to work with Newton customers, and chose two installers. The installers have been serving Newton customers, at reduced prices, for the past year, and have agreed to continue to do so for at least one additional year despite the fact that the original grant was for one year only.
