

Mayor Ruthanne Fuller and the City of Newton present Newton Power Share Project

Investing Now for
Newton's Future

Newton's electricity customers who are on Eversource Basic Service are automatically enrolled in Newton Power Choice, Newton's municipal aggregation program, at the standard 80% "green" level. This means that these customers support the development of renewable electricity, from sources like solar and wind, for 80% of their electricity purchase. This is the highest percentage of renewables of any municipal aggregation program in the State. Newton's approach has been a model for many other communities, which are increasing the level of renewable power in their aggregation programs.
