

OPTION "A" - Newton South High School Athletic Field Select Buffer Planting Plan

Summary: The proposed planting buffer will selectively place evergreen trees and woody plants among existing vegetation along the property line of the two abutting property owners. The planting area will be cleared of brush and invasive plant material prior to buffer plant material installation. The selected plant material were chosen due to their native and shade tolerance characteristics.

Proposed planting schedule:

9 Tsuga Canadensis , Eastern Hemlock, 8'to 10' minimum size, B & B root ball . See plan for plant locations. Plan symbol is :
