FUNDING	\$ 133,002 \$ 5,928,000					\$ 6,061,002	
Project SUMMARY	Explain how the project will use the requested CPA funds. You may provide more detail in attachments, but your PROJECT SUMMARY MUST FIT IN THE SPACE BELOW. Use a cover letter for general information about the sponsoring organization's accomplishments.						

Funding Request - The CPA recently provided the Commonwealth Avenue Carriageway Redesign Project \$390,000 for design, to take the project from 25% design to final design. The City respectfully requests an additional \$133,002 in design funding to complete the design process. Since submission of the 25% design, there has been additional coordination required due to a scope change at Ash Street where the existing signal was deemed to be unwarranted by MassDOT. In working with the residents and MassDOT, the City needed to design a new alternative for Ash Street, as well as carry two alternatives through the 25% design process. This has been important, but unexpected work that is critical to maintaining and ensuring community support for the project. The requested additional funding will cover services required to perform the out-of-scope work performed on the additional alternatives and will enable the City to finish the design process and be constructed on time. The project is currently scheduled to start construction in Spring 2023.

Project Summary - The project will redesign a critical compromised segment of the Commonwealth Avenue Carriageway from Lyons Field to the Marriot driveway. The project will create new green space and add a continuous walking and bicycle path where the roadway currently exists by rerouting vehicular traffic from north of the median to the south. Project benefits include: a) increase the overall amount of green space b) link myriad trail networks including the Charles River Path, the Riverside Greenway trail network and Weston's planned shared use path on Commonwealth Ave from Newton to Natick, c) increase visibility and access to the Charles River at the historic boathouse d) improve transit access in the area by upgrading bus stops.

The Commonwealth Avenue Carriageway, the crown jewel of Newton, provides a nearly continuous east to west linear park, and walking and bicycling route for the expanse of Newton. Between Lyons Field and the Charles River bridge, however, the Carriageway assumes a compromised form, carrying the westbound vehicular traffic as it approaches Highway 195 and 190. The project will reroute the westbound vehicular traffic south of the median, allowing the Carriageway to again support biking and walking.

MassDOT has fully funded construction of this project with \$5,900,000. Construction has been moved up to FY23 from FY25with construction planned to start in spring 2023. The project will be constructed in coordination with MassDOT's \$23.8M Project 110980 Newton-Weston-Bridge Rehabilitation South Avenue (Rt. 30) over the Charles River which abuts our project. Both share a project limit of the Marriot Driveway. Constructing these projects in tandem means the Carriageway bike and pedestrian facilities and green space will be carried from Lyons Field, past our project limit at the Marriott, to the bridge over the Charles River. MassDOT has also initiated a new project to look at continuing the bike and pedestrian west beyond the Charles Rover over 195.

You may adjust the space for each question, but the combined answers to all questions on this page must fit on this page.

COMMUNITY NEEDS	From each of at least 2 plans linked to the <u>Guidelines & Forms</u> page of www.newtonma.gov/cpa , provide a brief quote with plan title, year, and page number, showing how this project meets previously recognized community needs. You may also list other community benefits not mentioned in any plan.				

This project restores a critical gap of the Commonwealth Avenue Carriageway to its preferred form of a linear parkway and pathway for people recreating on foot and on bicycle. Numerous plans recognize the need for this project. More importantly, both the City of Newton and MassDOT have committed financially to this project: A) Newton's Capital Improvement Plan has committed \$200,000 to 25% design in FY21. The City has contracted with Howard Stein Hudson and has completed 25% design. The City had previously committed \$24,000 for concept design, which has since been completed. B) MassDOT has committed more than \$5,900,000 to construction in FY2023 through their Bicycle and Pedestrian Projects budget, to coincide with the construction of MassDOT's previously mentioned bridge project.

Current plans which reference this project are as follows:

- 1. Newton Capital Improvement Plan, 2020, page 6, "Two new Complete Streets projects were approved in the spring of 2019. The second project is the Commonwealth Avenue Carriageway improvements. This Auburndale project will complete MassDOT's work on the Charles River Bridge. The segment along Comm Ave will be a shared use path for pedestrians and bicycles on the Charles River Trail from Lyons Field to the Auburn Street intersection then connecting to walkable streets over Pigeon Hill to trails along the river"
- 2. MassDOT State Prioritized Bicycle and Pedestrian Projects, FY 2025, Project construction funded. Project ID 610674. (To be posted shortly on MassDOT/MPO website. Project approved by vote at MPO meeting on 5/25)
- 3. Metropolitan Area Planning Council Landline Vision Plan, 2018, Shown on map. https://trailmap.mapc.org/
 The LandLine is a vision for a continuous trail network throughout the metro-Boston area.
- 4. Newton Open Space and Recreation Plan 2020-2027, 2020, page 153, "81. Create a safe, low-stress bike lane on Commonwealth Avenue Carriage Lane."

COMMUNITY CONTACTS

List at least 3 Newton residents or organizations willing and able to comment on the project and its manager's qualifications. No more than 1 should be a supervisor, employee or current work colleague of the project manager or sponsor. Consult staff on the community contacts required for your specific proposal.
