HOME-ARP ACTIVITIES.....	47
HOME-ARP PRODUCTION HOUSING GOALS	50
OTHER PLAN ELEMENTS	50
APPENDICES	51

INTRODUCTION

Upon passage of the American Rescue Plan Act of 2021 (“ARP”), Congress and the U.S. Department of Housing and Urban Development (HUD) approved \$5 billion for HOME participating jurisdictions (PJs) to invest in housing and assistance for people experiencing homelessness and other vulnerable populations. Unlike the traditional HOME program, which specializes in building, buying, and rehabilitating affordable housing, HOME-ARP is designed to strengthen efforts to prevent and end homelessness. HUD awarded the WestMetro HOME Consortium \$5,406,962, for use within its thirteen communities: Bedford, Belmont, Brookline, Concord, Framingham, Lexington, Natick, Newton, Needham, Sudbury, Waltham, Watertown, and Wayland. The City of Newton is the Lead Entity.

The HOME-ARP program requirements are outlined in HUD’s Community Planning and Development Notice CPD-21-10. HOME-ARP funds can support the following eligible activities: Administration and Planning (15 percent cap), Rental Housing, Tenant Based Rental Assistance (TBRA), Supportive Services, Non-Congregate Shelter Development and Acquisition, and Nonprofit Operating and Capacity Building Assistance (10 percent cap). Activities must primarily benefit individuals and families in the following Qualifying Populations (QPs):

- Homeless, as defined in 24 CFR 91.5;
- At Risk of Homelessness, as defined in 24 CFR 91.5;
- Those Fleeing, or Attempting to Flee, Domestic Violence, Dating Violence, Sexual Assault, Stalking, or Human Trafficking, as defined by HUD in CPD-21-10;
- Other populations requiring services or housing assistance to prevent homelessness and other populations at greatest risk of housing instability, as defined by HUD in CPD-21-10;
- Veterans and families that include a veteran family member that meet the criteria in one of the populations above.¹

The HOME-ARP Allocation Plan requires an Amendment to the HOME FFY2021 Annual Action Plan (AAP) and approval from HUD before the WestMetro HOME Consortium can receive and commit funds to the eligible activities. To ensure resources from this one-time funding source address the most pressing needs within the region, the WestMetro HOME Consortium conducted broad community outreach to engage stakeholders, advocates, housing and

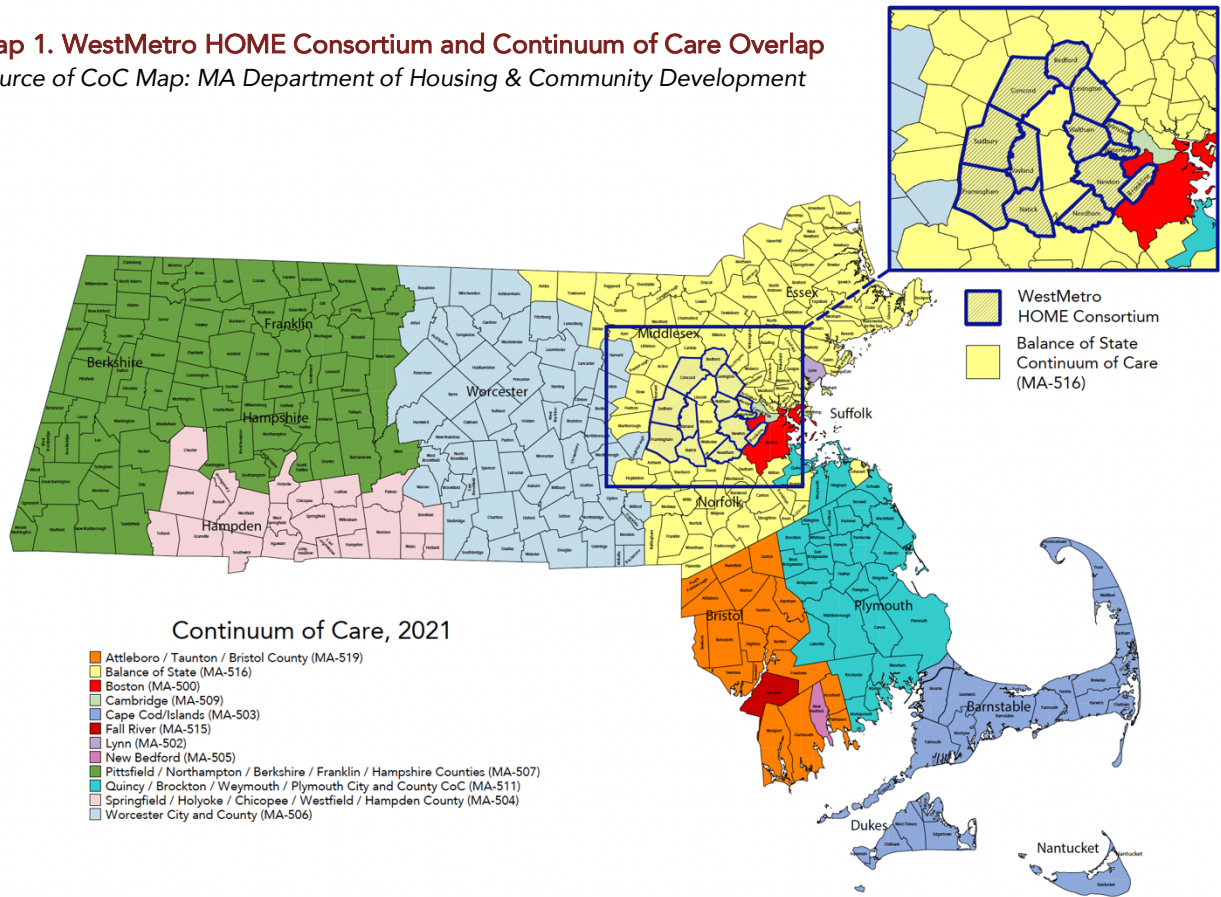

¹ U.S Department of Housing and Urban Development, *CPD Notice 21-10*, Sections IV.A (“Qualifying Populations”) and Section VI (“Eligible Activities”). September 2021.

homelessness service organizations, and members of qualifying populations. This consultation and public participation process, coupled with a needs assessment and gaps analysis, informed the proposed funding distribution by activity in this Allocation Plan.

Map 1 below shows the geographic relationship between the WestMetro HOME Consortium and the Continuum of Care in which it is located.² In this plan, the “Consortium” refers to the WestMetro HOME Consortium, which includes thirteen Massachusetts communities: The Towns of Brookline and Needham are in Norfolk County, while the Towns of Bedford, Belmont, Concord, Lexington, Natick, Sudbury, and Wayland and the Cities of Framingham, Newton, Waltham, and Watertown in Middlesex County. “Balance of State Continuum of Care,” “Balance of State,” or “BoS CoC” refers to the MA Balance of State Continuum of Care (MA-516).

Map 1. WestMetro HOME Consortium and Continuum of Care Overlap

Source of CoC Map: MA Department of Housing & Community Development

² A Continuum of Care (CoC) is a regional or local planning body that coordinates housing and services funding for homeless families and individuals. CoCs apply annually to the U.S. Department of Housing and Urban Development (HUD) for funds to help homeless people. There are twelve CoCs within Massachusetts.

Table 1 below provides a high-level demographic snapshot of each Consortium community.

Table 1. WestMetro HOME Consortium Communities: An Overview

	Total Population	Total Households	% Renter Households	% Minority ³	Median Household Income
Bedford	14,383	5,219	29.4%	26.4%	\$140,647
Belmont	27,295	10,253	36.6%	30.4%	\$151,502
Brookline	63,191	26,525	51.7%	34.7%	\$122,356
Concord	18,491	6,795	25.4%	18.2%	\$169,335
Framingham	72,362	27,555	44.8%	46.3%	\$90,638
Lexington	34,454	11,849	17.2%	43.3%	\$202,852
Natick	37,006	14,956	32.7%	24.4%	\$122,914
Needham	32,091	11,282	15.6%	18.9%	\$182,813
Newton	88,923	31,704	28.2%	29.9%	\$164,607
Sudbury	18,934	6,386	7.4%	19.1%	\$217,847
Waltham	65,218	25,129	50.2%	39.6%	\$103,498
Watertown	35,329	16,134	50.5%	26.9%	\$101,402
Wayland	13,943	5,013	9.0%	23.2%	\$203,789
TOTAL	521,620	198,800	36.5%	32.5%	\$130,652

³ Minority population includes Hispanic, all races including White and not Hispanic, all races other than White.

⁴ Population and household counts in this table may differ from other references in this plan; the above table uses official 2020 US Census counts, whereas most references to households in this plan use the most recent Comprehensive Housing Affordability Strategy (CHAS) data.

CONSULTATION⁵

Describe the consultation process including methods used and dates of consultation.

The WestMetro HOME Consortium developed an Engagement Plan to guide the consultation and participation processes required for the HOME-ARP Allocation Plan. This Engagement Plan provided for consultation meetings with community partners, including the Continuum of Care, homeless service providers, domestic violence service providers, veterans’ groups, public housing authorities (PHAs), public agencies that address the needs of the qualifying populations, and public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities. Many of these groups fill multiple roles through their housing inventory, shelter services, programming, or collaboration with other organizations.

Table 2. Consultation Interviews & Meetings

Date	Invitees	Date	Invitees

⁵ In accordance with Section V.A of the Notice (page 13), before developing its HOME-ARP allocation plan, at a minimum, a PJ must consult with; CoC(s) serving the jurisdiction’s geographic area; homeless service providers; domestic violence service providers; veterans’ groups; public housing agencies (PHAs); public agencies that address the needs of the qualifying populations; and public or private organizations that address fair housing, civil rights, and the needs of persons with disabilities.

CONSULTATION INTERVIEWS & MEETINGS

At the outset of this process, the Consortium collaborated on the development of an initial project contact lists based upon previous community development engagement efforts. The City of Newton built upon this list and introduced the project by sharing the Engagement Plan and soliciting feedback. The Consortium then contacted nearly 275 individuals or organizations to participate in consultation interviews, requested meeting times during standing meetings of community partners, and arranged an in-person meeting with those experiencing homelessness at the Community Day Center of Waltham. **Table 2** above lists the consultation interviews and meetings by category and date, while **Table 3** below details the feedback received from the consultation process. The WestMetro HOME Consortium representative members discussed the HOME-ARP Allocation Plan and gave input during their meetings on November 03, 2022 and February 02, 2023. During the February 2023 meeting, the group discussed and voted on the funding allocation outlined in this Plan.

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
Town of Sudbury <i>Health Department</i>	Public agencies that address needs of QPs	Virtual Meeting 10/20/2022: Consortium Municipal Staff	Participants discussed the need to streamline processes of accessing assistance, services, housing, etc., as the stress of experiencing or being at risk of homelessness is traumatic. Rising housing-related costs have resulted in significant uptick in need and there are extremely long waitlists in all communities for housing. Many public housing units are not suitable for those with disabilities. Mold and resulting health problems were cited as a significant concern. In addition to streamlining access to services and supports, participants noted that financial assistance such as TBRA, gift cards, groceries, etc. can help alleviate the significant emotional and financial stress at-risk households face.
Town of Needham <i>Public Health</i>			
Town of Watertown <i>Veterans' Services</i>	Veterans' groups		

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
Town of Lexington <i>Human Services</i>	Public agencies that address needs of QPs	Virtual Meeting 10/21/2022: Consortium Municipal Staff	Attendees stressed the importance of helping people remain housed if at risk of eviction. This often includes mental health care and other supportive services, which Housing Authorities are generally not equipped to provide without a services coordinator. Other services needed include help with the housing search process, including filling out applications, etc., as staff do not have the capacity or training to act as case managers. One attendee noted that people may be selected in affordable housing lottery but then not be able to finish the application and lose the unit. Vulnerable households include seniors (an increasing number of whom are doubling up), immigrants living in overcrowded conditions, and those with disabilities unable to find an accessible unit. Ultimately many of the issues connect to the lack of availability and variability in housing stock and the resulting years-long waitlists for housing.
City of Framingham <i>Community Development Department</i>			
City of Waltham <i>Planning Department</i>			
Town of Wayland <i>Planning Department</i>			
Town of Newton <i>ADA Coordinator</i>	Public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities		
Town of Needham <i>ADA Coordinator</i>			
Bedford Housing Authority	PHAs	Virtual Meeting 10/21/2022: Consortium Housing Authorities	Housing authorities discussed the lack of services available to vulnerable tenants and noted that sometimes they need to reach out to family of tenants to get them involved. HAs do not all provide housing search assistance tied to the vouchers they administer, and people may lose their vouchers because they cannot find a unit in a timely manner. Vouchers also cannot close the gap between what a landlord could get on the market and what the voucher will match. Generally, there is a need for more units (including accessible units) and more homeless prevention services. All attendees reported getting daily calls from people looking for help and unsure where to turn.
Needham Housing Authority			
Newton Housing Authority			

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
City of Watertown <i>Planning Department</i>	Public agencies that address needs of QPs	Virtual Meeting 10/24/2022: Consortium Municipal Staff	Municipal staff in attendance described the lack of legal services, representation, and advocacy for tenants. Some noted that voucher householders sometimes cannot locate a unit and are forced to move away or lose their voucher. Participants discussed the need for more rental units for those who are really struggling. The geographic isolation of some Consortium communities in relation to shelters means there is no good immediate option and people spend savings on motels. Populations with the greatest need include families with children, veterans, seniors, and immigrants. There has been an increase in “couch surfing” or doubling up, both among seniors and immigrant families. Priority needs identified include case management that follows the household, units for a variety of populations (size/type), and rental assistance to stabilize at-risk households.
Town of Bedford <i>Health & Human Services</i>			
Town of Needham <i>Youth & Family Services; Housing Division</i>			
Belmont Housing Authority	PHAs	Virtual Meeting 10/25/2022: Consortium Housing Authorities	Participants discussed the lack of supportive services for HA residents and how this resource is critical for vulnerable households. A resident services coordinator would be very helpful for addressing these needs. Attendees also discussed the inaccessibility of older units and the need for rehabilitation across communities.
Framingham Housing Authority			
Watertown Housing Authority			
Wayland Housing Authority			
Brookline Housing Authority	PHAs	Written comments provided by Brookline Planning & Community Development Department 10/25/2022	Waiting lists for seniors and the disabled include 2,551 households, and 6,033 households for family housing. Ten to 20 percent are fleeing extreme needs such as domestic violence, homelessness, facing eviction, or are victims of fire or natural disasters. Minority populations tend to be concentrated in BHA properties located in the northern section of the Town along with most of the Town’s other affordable housing developments.

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
Town of Needham <i>Building Department; Public Health</i>	Public agencies that address needs of QPs	Virtual Meeting 10/25/2022: Consortium Municipal Staff	Attendees discussed the need for housing with supportive services, emphasizing that services are key for vulnerable households. All PHAs generally can offer is housing, even though many tenants need services. Some specified that having counselors with lived experience would be helpful. Municipal staff often do not have access to resources to assist those in emergency situations or are unsure where to direct people. As one attendee explained, “We are not case workers skilled in navigating the affordable housing world and the application process” such as pulling together documents, deadlines, etc. With COVID-related resources running out, there was concern about an impending “tsunami of evictions.” There was consensus that creating rental housing was a priority, with capacity to be able to provide referrals and other supports to people. RHSO provided additional written comment on 12/08/2022 advocating for TBRA to help tenants stay in their homes, particularly extremely low-income households most impacted by COVID.
Town of Belmont <i>Planning Department</i>			
Town of Brookline <i>Planning Department</i>			
City of Newton <i>Senior Center; Housing & Community Development Office</i>			
Regional Housing Services Office (RHSO)			
Sudbury Housing Authority	PHAs		
South Middlesex Opportunity Council (SMOC)			
Metro Housing Boston	Housing and homeless service providers	Virtual Meeting 10/31/2022: Shelters & DV Service Providers	While providers noted the need for more accessible units, discussion focused considerably on supportive service needs. Metro Housing Boston stated that representative payee programs for Social Security or SSI payments would be helpful for those who cannot manage these payments. Programs around hoarding and other mental health issues are also needed to help tenants at risk of eviction. Job skills training would be valuable for single adults not yet eligible for Social Security but who have aged out of or lost long-term employment. Wrap around services (financial assistance, landlord/tenant help, education) can ensure people will remain successfully housed. Lastly, it was noted that staffing at shelters is a challenge.

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
Watertown Foundation	Community resources	Virtual Meeting 10/31/2022: Service Providers, Agencies, Organizations	Attendees discussed the importance of TBRA and other forms of financial assistance. Short-term rental assistance administered at the local level (as opposed to RAFT or other resources administered by a larger entity) can allow communities to help households quickly. ⁶ Supportive services were also highlighted as a need, with one attendee noting that “just three people can help 700 households a year” by providing consistent case management. Legal services to assist those facing evictions were also emphasized. In terms of demographics of those in need, participants discussed households “doubling up,” undocumented immigrants, older adults who may not have a disability but are not old enough to qualify for Social Security, couples who will be separated by gender, and others without a safety net.
Watch CDC	Public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities		
Housing Families			
Newton Fair Housing Committee	Public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities	Virtual Committee Meeting 11/01/2022 (Standing Meeting)	Following a 11/01/2022 presentation to the Newton Fair Housing Committee, the NFHC provided a written response on 11/07/2022. The committee noted that available data does not fully identify need, especially for the “invisible homeless” and the “disability homeless” in each community. There is a need for emergency services and shelter in the City of Newton that are not being met. Those who are homeless or at-risk are often forced to leave Newton because there are not enough emergency services or other resources in the community and the waitlist for a voucher in is approximately nine years. The NFHC stated that Consortium should ensure that services and shelter are provided equitably among the WestMetro communities to avoid displacement of residents in need and noted Newton’s responsibilities to Affirmatively Further Fair Housing.

⁶ RAFT: Residential Assistance for Families in Transition

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
Wayside Youth	Human services; homeless service provider	Virtual Meeting 11/02/2022: Service Providers, Agencies, Organizations	Attendees noted the need for more affordable rental housing and vouchers, as well as more temporary solutions including hotel vouchers, to help during transitions. Low threshold housing and housing search assistance are important for getting vulnerable populations access to units; this process can be difficult for those with fluctuating incomes, no credit history, or with a criminal record. Eligibility requirements for programs such as RAFT are also problem because people need to be on the brink of homelessness to get help. Rental support (for current and back rent) to catch people prior to getting an eviction notice should be available. Many applications for Cousens fund assistance are either families or those over 70, and mostly renters versus homeowners, with 75% of requests asking for rental help.
Department of Mental Health	Public agencies that address needs of QPs		
Newton Cousens Fund	Community resources		
Community Day Center of Waltham	Homeless service providers	Virtual Meeting 11/02/2022: Shelters & DV Service Providers	Providers discussed challenges with accessing financial assistance, both to remain housed and to move into housing. RAFT takes too long, people who are housed are experiencing more instability than ever before, and upfront costs for moving high. Some noted an increase in non-English speakers and described the challenges of helping these and other vulnerable populations get necessary documentation. One provider noted an increase in younger folks needing shelter, particularly young parents (teens/early twenties). Providers also emphasized the importance of housing search assistance and other supportive services such as mental health support. Lack of credit or landlord history makes getting a unit difficult and people do not know where to turn. Attendees agreed that TBRA and supportive services are a crucial use of funds.
Family Promise MetroWest			
REACH	Domestic violence service providers		

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
Waltham Public Schools	Public agencies that address needs of QPs	Virtual Meeting 11/02/2022: McKinney-Vento School Liaisons	Attendee described students living in unsafe or overcrowded situations, particularly immigrant families, and having challenges proving Waltham residency. The cost of transporting McKinney-Vento students is also exorbitant (\$500-\$1,000 per day per route), and those funds potentially could be better used to help families. All HOME-ARP activities have the potential for good, but there is skepticism that communities would support more housing or shelter at the local level.
The Brookline Center for Community Mental Health	Human services provider	Virtual Meeting 11/03/2022: Service Providers, Agencies, Organizations	Meeting participants discussed the challenges with relocating and finding housing due to competitive market, loss of jobs during pandemic, and difficulty matching with potential roommates. Attendees stressed the need for housing search assistance to foster connections with landlords. RAFT changes have made it very difficult for families to access support before being threatened with eviction. Supportive services are crucial, and case management provided at shelters is often insufficient according to clients. Folks with mental health challenges are more likely to struggle with keeping on top of the paperwork. Priority activities should include rental housing construction and rehabilitation with embedded supportive services.
West Suburban YMCA	Homeless service provider		
MetroWest Mediation	Legal services		
MA Department of Mental Health	Public agencies that address needs of QPs		
Framingham Public Schools	Public agencies that address needs of QPs	Virtual Meeting 11/03/2022: McKinney-Vento School Liaisons	Participants discussed the need for immediate resources to help families in crisis, particularly short-term transitional stays while waiting for shelter. Unaccompanied youth also have unique challenges and support needs. Concerns discussed included families not knowing where to go for assistance; immigrant families being fearful about seeking help; and need for legal/mediation support for families facing eviction.
Wayland Public Schools			

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
CAN-DO	Public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities	Virtual Meeting 11/03/2022: Advocacy Groups and Organizations	Attendee emphasized the need to get information from and into the hands of those who would most benefit from these funds, noting that language accessibility is a large problem. The concentration of need is connected to where resources are, so while some more affluent communities may appear to have lower needs, it may be that households have had to relocate. RAFT program changes were also identified as a problem for households, as it is now more difficult to get assistance unless about to be evicted. The attendee also discussed the trauma of homelessness or being at risk and the need for services that meet people where they are. CAN-DO also shared suggestions for other groups to connect with in this process.
Natick Affordable Housing Trust	Public agencies that address needs of QPs	Virtual Meeting 11/04/2022: Advocacy Groups and Organizations	Attendees highlighted that accessibility of older buildings an issue; Family Promise was able to address this with private fundraising, but for housing units in the community, this continues to be a problem. The lack of units and length of waitlists (8+ years for Section 8) is a major source of frustration. Attendees identified creation of units (over non-congregate shelter) and TBRA as priorities.
Family Promise MetroWest	Homeless service provider		
Newton Community Development Foundation	Nonprofit housing developer	Virtual Meeting 11/04/2022: Nonprofit Housing Developers	Attendees noted an increase in families with children facing homelessness as compared to seniors. HOME-ARP funds should focus primarily on unit creation; for NCDF, supportive services would go together with any units they create because they have a resident services coordinator and partner with other organizations such as Springwell.

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
MetroWest Community Development Corporation	Nonprofit housing developer	Phone Call 11/08/2022: Nonprofit Housing Developers	MWDCDC holds lotteries every two years and noted that senior and family housing is the most in demand. Recognizing the need for housing search assistance, MWDCDC provides weekly sessions open to the public. Costs associated with moving are also a major challenge. Supportive service needs include financial assistance, legal support, and job skills training.
Balance of State Continuum of Care	Continuum of Care	Virtual Meeting 11/09/2022: Continuum of Care	Continuum of Care staff discussed challenges of conducting PIT counts, particularly after COVID. Attendees also discussed the importance of collaborative funding for future projects and consulting with developers to get an understanding of feasibility.
Newton Commission on Disabilities	Public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities	Virtual Committee Meeting 11/14/2022 (Standing Meeting)	Participants discussed the need for accessible apartments in Newton, especially at extremely low-income levels. Some also stated that Housing Authority residents would benefit from having greater access to supportive services, including financial and rental assistance. Nonprofits who assist those with intellectual or developmental disabilities would benefit from being able to set units or funds aside for their clientele.
Newton Housing Partnership	Public agencies that address needs of QPs	Virtual Committee Meeting 11/15/2022 (Standing Meeting)	Partnership members emphasized that development takes time and is extremely expensive. Discussion focused on whether it made sense to use the funds on supportive services and TBRA over development.
Engine 6 Newton Housing Advocates	Public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities	Virtual Committee Meeting 11/29/2022	Members discussed best possible uses of funds, noting that development takes a long time and perhaps the focus should be on projects already in motion within the Consortium communities. Supportive services that help stabilize vulnerable households would also be highly beneficial.

Table 3. Summaries of Consultation Interviews & Meetings

Groups Consulted	Category	Method	Feedback Summary
Community Day Center of Waltham: Guests & Staff	Qualifying Population & Homeless service provider	In-Person Meeting 12/02/2022	See summary following this table.
Newton Planning and Development Board	Public agencies that address needs of QPs	Virtual Board Meeting 01/19/2023 (Standing Meeting)	Because the Newton Planning & Development Board hosts public hearings for the Consortium’s plans, this pre-hearing public meeting served to provide the P&D Board with information about the project and findings to date, with an opportunity for questions and comments. Discussion focused on some of the needs highlighted in the data, as well as suggestions for presenting the information during the public hearing.
WestMetro HOME Consortium	Public agencies that address needs of QPs	Virtual Meetings 11/03/2022 02/02/2023 (Standing Meeting)	Consortium members discussed needs assessment and gaps analysis findings at both meetings, as well as a summary of the consultation and public participation takeaways at the February meeting. During the February 2023 meeting, members reviewed several funding scenarios, ultimately refining and selecting the proposed allocation included in this Plan by unanimous vote of members present.

CONSULTATION WITH QUALIFYING POPULATIONS

City of Newton staff and project consultants attended a meeting at the Community Day Center of Waltham to meet with those experiencing homelessness. Guests emphasized the need for units, fewer roadblocks to *getting* a unit, financial assistance associated with moving (e.g., first, last, and security), and consistent case management with housing search assistance. Food cards, transit cards, and other small payments are enormously helpful and allow those experiencing homelessness to have one less roadblock to navigate. In terms accessing housing, there are often so many barriers and strings attached that it can be especially difficult when homeless; applications are overly complex, many do not have access to a computer, and gathering paperwork is time-consuming and potentially costly.

Guests described how doing the “right things” needed to improve individual circumstances — e.g., getting a job and looking for housing — are extremely difficult when homeless, and even more so with a criminal record. “Bad things” are happening every day — particularly in encampments — because people do not have a roof over their heads. Maintaining sobriety often requires distancing oneself from individuals still actively battling substance use issues, which is difficult with “nowhere to go.” There is a real need for stability; having a small place to live and sleep such as an SRO would be extremely helpful and healing. Some expressed frustration with how hard it is to access help, how long everything takes, how many roadblocks there are, and being repeatedly asked to share their stories without any benefit to them.

The most stated needs in addition to simply having a unit typically related to financial challenges, as landlords require first, last, and security deposits, as well as broker’s fees more recently. Landlords seem to be “traumatized” by the eviction moratorium and seem less likely to rent to unhoused folks. This point was also emphasized by staff, who stressed the importance of building relationships with landlords, connecting clients who are likely to be successful in maintaining their housing, and continuing to check in on clients once housed to keep that trust with landlords.

CONSULTATION SURVEY

In addition to the above consultation meetings, the Consortium circulated an online survey for service providers. The survey was sent to Continuum of Care (CoC) staff, homeless service providers, domestic violence service providers, veterans’ groups, public housing authorities (PHAs), public agencies that address the needs of the qualifying populations, and public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities. Twenty-five people responded to the survey, which was open from December 16, 2022, to January 16, 2023. Questions focused on the identification of barriers for those who are experiencing homelessness or are at risk of homelessness, gaps between housing, shelter, and service delivery, anticipated resources to leverage with HOME-ARP funds, and how to prioritize the eligible activities based on level of need. “Development or preservation of affordable rental housing” was labeled as the most urgent need, and “creating new affordable housing units” was the most urgent need relating to affordable rental housing. The second highest need identified was supportive services, with “homeless prevention” ranked as the greatest need for supportive services. A complete survey summary can be found in the Appendix.

Summarize feedback received and results of upfront consultation with these entities.

Consultation involved three main activities: interview sessions, meetings with the WestMetro HOME Consortium, and a provider survey. The interviewed stakeholders represented a variety of affiliations, including the Continuum of Care, homeless service providers, domestic violence

service providers, veterans' groups, public housing authorities (PHAs), public agencies that address the needs of the qualifying populations, and public and private organizations that address fair housing, civil rights, and the needs of persons with disabilities.

These community partners had varying levels of direct experience with the Qualifying Populations under HOME-ARP, and the Consortium communities differ from each other considerably in terms of demographics (see Table 1); nonetheless, some key observations were commonly shared:

- There is marked increase in need, with more at-risk households who previously would have been able to "stay afloat" no longer able to keep up with rising costs.
- The cycle of homelessness is often precipitated and perpetuated by small hurdles that snowball.
- Many interrelated issues are rooted in the broader need for more deeply affordable rental housing and supportive services.
- Navigating the continuum of services, shelter, and housing is extremely confusing, time intensive, and challenging, especially for those in the midst of a crisis.
- Certain vulnerable subpopulations have unique needs, including elderly populations, immigrants/ESL populations, youth and young adults, LGBTQ youth, single-parent households, those with mental illness, and those with substance use disorders, including those in recovery.

PUBLIC PARTICIPATION⁷

Describe the public participation process, including information about and the dates of the public comment period and public hearing(s) held during the development of the plan.

The Public Participation process included three initial community meetings (virtual), an online community survey, and a final virtual public hearing on the Draft Plan.

- **Date(s) of public notice:** The Public Notice for the public hearing ran in the Boston Herald and MetroWest Daily on February 22, 2023 and was distributed to the project email list on February 27, 2023.
- **Public comment period:** Start date – March 6, 2023; end date – March 21, 2023
- **Date(s) of public hearing:** March 6, 2023 (virtual)

Table 4 below outlines the complete list of public participation efforts conducted during the development of the HOME-ARP Allocation. Participants in any engagement effort had their information added to the project contact list for future updates. More information on feedback from each effort is described in the upcoming narratives.

Table 4. Public Participation Opportunities

Engagement Method	Location	Date and Time	Attendees
Virtual Public Meeting #1	Zoom	12/05/2022 • 7:00-8:30pm	19

General Public Survey	Online (Qualtrics)	11/21/2022 to 12/22/2022	204
Virtual Public Hearing	Zoom	03/06/2023 • 7:00pm	TBD
Comment Period	--	03/06/2023 to 03/21/2023	TBD

Describe efforts to broaden public participation:

The public participation aligned with the project’s Engagement Plan as well as the Consortium’s Citizen Participation Plan to provide for effective communication, accessibility, reasonable accommodation for persons with disabilities, and meaningful access to participation by limited English proficient (LEP) residents. The project’s initial stakeholder and distribution list was built

⁷ PJs must provide residents with reasonable notice and an opportunity to comment on the proposed HOME-ARP allocation plan of no less than 15 calendar days. The PJ must follow its adopted requirements for “reasonable notice and an opportunity to comment” for plan amendments in its current citizen participation plan. In addition, PJs must hold at least one public hearing during the development of the HOME-ARP allocation plan and prior to submission

out with assistance from Consortium representatives and City staff. As the project progressed, the list of contacts evolved and lengthened.

Initial community meetings and the public survey were advertised within Consortium communities with assistance from the WestMetro HOME Consortium, on social media, and through email blasts to the project distribution list. Attendees who registered in advance for the community meetings were able to request oral interpretation in several languages other than English; one participant requested and was provided a Spanish interpreter. The community survey was translated into Simple Chinese, Haitian Creole, Portuguese, Russian, Spanish, and Urdu. The formal public hearing was advertised in the Boston Herald and MetroWest Daily News and shared through the previous outreach methods used for the initial community meetings and online survey. Those requesting reasonable accommodations had a point of contact at the City.

The formal Public Notice and the Engagement Plan are provided in the Appendix.

Summarize the comments and recommendations received through the public participation process, either in writing or orally at a public hearing.

DECEMBER COMMUNITY MEETINGS

The WestMetro HOME Consortium held a series of three community meetings in December 2022. All meetings followed the same format.

December 5, 2022 Key Takeaways

- Broader societal issues intersect with homelessness; inequities within support systems are reflected in inverse levels of need.
- Newcomer populations face unique challenges due to language barriers and immigration issues.
- Domestic violence is likely underreported. Other readily available statistics also likely downplay need among vulnerable populations: “Numbers make good bureaucratic sense but are not reflective of the reality.”
- Many households are afraid of eviction, especially when landlords seem determined to remove a tenant and begin imposing fees or other random costs. Much of this concern comes from families with younger children.
- It is critical to engage with populations for whom the funds are intended to benefit. However, this can be traumatic for vulnerable populations, as they live through this every day and are often repeatedly expected to share their experiences with little benefit to them. Promises to compensate either go unfulfilled or take too long. Compensation should be immediate at the time of consultation.

December 6, 2022

- Families with children and people with disabilities often face discrimination.
- Tenants often do not know their rights. When people are facing homelessness, they are too pressured to advocate for themselves.
- An increase in housing search assistance and housing advocates would have enormous benefit. The lack of housing has led to a highly competitive rental market makes the housing search process emotionally taxing on folks.
- Massachusetts has a new tool called the Housing Navigator; all available units that are affordable and accessible statewide should be listed on this resource.
- Affluent communities without proximity to need tend to see the problem as being “elsewhere” — without reflecting on why people who work in their communities are often unable to live there.

December 7, 2022

- Those most at risk include: homeless or at-risk population age 16-24, particularly those with mental health issues; LGBTQ youth without family support systems; low-income and working families with children; single parents, particularly those moved into the community from DV or family shelters; immigrant households; older adults with adult children living at home due to mental or physical health issues; and seniors at risk of losing housing.
- Seemingly indirect issues often add to the challenges vulnerable households face. E.g., those complex medical needs sometimes forego necessary treatment because of transportation challenges.
- Overcrowding is increasingly common among immigrant families in Waltham; however, this population is fearful about seeking help because of their status.
- Current systems do not consider the impact of trauma on executive functioning - it can be hard to remember details, focus, stay calm, and plan. Forms, applications, and programs are too complex or have too many steps for people *without* these challenges, let alone for someone experiencing the trauma of homelessness. “This is not a personal deficit problem; this is a structural problem.”
- People must retell and reshare their trauma repeatedly to get their needs met because they are referred to multiple organizations. The solution would be for those in need to have one (trained) point person who can do complex case management and assess what an individual can or cannot do.

- Getting into units as a challenge for potential tenants who do not pass a background check, have poor credit, are voucher holders, etc. Some are forced to pay a broker to assist in the search, which is costly.

COMMUNITY SURVEY TAKEAWAYS

The Consortium circulated an online survey from December 16, 2022 to January 16, 2023, available in English, Simple Chinese, Haitian Creole, Spanish, Portuguese, Russian, and Urdu. There were 204 responses, 3 of which were in Spanish and the rest in English. When asked what the top five needs were from a list of thirteen options, affordable rental housing was the most popular selection, with 79 percent of survey-takers choosing it among their responses. Supportive services were the second most selected priority, although with 33 percent of respondents selecting this option, it was much further behind rental housing. A complete report of the results is in the Appendix.

NEEDS ASSESSMENT AND GAPS ANALYSIS⁸

The Needs Assessment and Gaps Analysis evaluates the size and composition of qualifying populations across the WestMetro HOME Consortium and compares that information with existing shelter, housing, and service gaps. The entirety of the Needs Assessment and Gaps Analysis uses quantitative and qualitative data, including observational data from the Allocation Plan’s Consultation and Public Participation phases. Quantitative data sources include but are not limited to the following, with abbreviations used throughout this Plan:

Balance of State Continuum of Care

- Point-in-Time (PIT) Count, 2022
- Housing Inventory Count (HIC), 2022
- Homeless Management Information System (HMIS), November 2022 Report

U.S. Bureau of the Census

- American Community Survey (ACS) Five-Year Estimates, 2017-2021
- U.S. Decennial Census, 2020

U.S. Department of Housing and Urban Development (HUD)

- Comprehensive Housing Affordability Strategy (CHAS), 2015-2019

Describe the size and demographic composition of qualifying populations within the PJ's boundaries.

HOMELESS AS DEFINED IN 24 CFR 91.5

The Point-In-Time (PIT) Count quantifies the number of sheltered and unsheltered people experiencing homelessness on a single night, typically in January. Continuums of Care (CoCs) conduct the annual count for those in emergency shelter, transitional housing, and Safe Havens.⁹

⁸ In accordance with Section V.C.1 of the Notice (page 14), a PJ must evaluate the size and demographic composition of all four of the qualifying populations within its boundaries and assess the unmet needs of each of those populations. If the PJ does not evaluate the needs of one of the qualifying populations, then the PJ has not completed their Needs Assessment and Gaps Analysis. In addition, a PJ must identify any gaps within its current shelter and housing inventory as well as the service delivery system. A PJ should use current data, including point in time count, housing inventory count, or other data available through CoCs, and consultations with service providers to quantify the individuals and families in the qualifying populations and their need for additional housing, shelter, or services.

⁹ Safe Haven is a form of supportive housing that serves hard-to-reach homeless persons with severe mental illness who come primarily from the streets and have been unable or unwilling to participate in housing or supportive services. Since the passing of The Homeless Emergency Assistance and Rapid Transition to Housing Act of 2009 (HEARTH Act), HUD no longer funds new Safe Haven projects.

Each count is locally coordinated and carried out with partners using Homeless Management Information Systems (HMIS) data collected through the Homelessness Data Exchange (HDX). The WestMetro HOME Consortium is within the Balance of State Continuum of Care (see Map 1). Where possible, the CoC provided data specific to the Consortium communities within their region.

The 2022 PIT Count identified 655 individuals in approximately 315 households experiencing homelessness within the Consortium. **Table 5** below shows 2022 PIT numbers of sheltered and unsheltered homeless individuals, both individuals and those within families. Unsheltered homeless individuals made up 8 percent (53 people), with the highest number of unsheltered individuals in Waltham (**Figure 1**).

Table 5. 2022 PIT Count

Status	# in CoC	# in Consortium
Emergency Shelter	2,652	546
Transitional Housing	281	56
Unsheltered	302	53
TOTAL	3,235	655

Of those counted in the 2022 PIT, 476 were in family households (157 households), not including the 47 counted in domestic violence (DV) shelters or transitional housing. The remaining 132 were individuals.

Racial & Ethnic Disparities

In addition to PIT Counts, data from the CoC’s Homeless Management Information System (HMIS) provides client-level data on the provision of homeless services within the region.¹⁰ Based on HMIS data, there are *significant* racial and ethnic disparities between the homeless population

¹⁰ Generally, DV victims receiving services or shelter from a DV provider are not included in HMIS.

and the total population of both the Consortium and the CoC region, primarily among Black and Hispanic populations (see Table 6); at 39 percent, Black individuals are significantly more represented among the homeless population within the Consortium compared to the total population of Consortium communities. Hispanic/Latino individuals are also overrepresented among the homeless population within the Consortium, jumping from 8 percent to 29 percent.

Table 6. Race and Ethnicity of Homeless Population Compared to Total Population

	CoC Region HMIS	CoC Region Total Population	Consortium HMIS	Consortium Total Population
Race				
White	48%	70%	36%	69%
Black	32%	5%	39%	4%
Asian Alone	1%	9%	1%	14%
Two or More Races	3%	8%	2%	8%
American Indian and Alaska Native	<1%	<1%	0%	<1%
Native Hawaiian and Other Pacific Islander	1%	0%	<1%	0%
Other/Unknown	14%	7%	23%	5%
Ethnicity				
Hispanic/Latino	32%	12%	29%	8%
Non-Hispanic/Latino	60%	88%	58%	92%
Unknown	8%	--	12%	--

Sources: Balance of State Continuum of Care 2022 PIT Count and 2020 US Decennial Census

The CoC has recently explored the issue of systemic inequity through data analysis and consultation with CoC members, including a mapping exercise and a member survey. The two most significant disparities identified through this process were:

- The percentage of persons or color in the homeless system far outweighed the percent in the overall population within the CoC.
- The percentage of placements into housing for persons of color was disproportionate to the percentage of white households placed. It was unclear if this was the result of landlord decisions or those made at the case management level.¹¹

HMIS includes data for the Street Outreach program, which includes activities designed to meet the immediate needs of unsheltered homeless persons by connecting them with emergency

¹¹ Massachusetts Balance of State Continuum of Care, "FY2022 CoC Collaborative Application," p.28. Accessed February 2023 at <https://www.mass.gov/doc/fy22-coc-application/download>

shelter, housing, or critical services, and providing them with urgent, non-facility-based care. There were no Street Outreach clients recorded in the Consortium communities; however, within the broader CoC region, there were ≈83 Street Outreach clients, 90 percent of whom were White. This may indicate that while Black persons are disproportionately represented among the homeless within the region (both sheltered and unsheltered), unsheltered homeless are much more likely to be White than any other race.

Chronically Homeless

HUD defines chronic homelessness as a homeless individual with a disability (as defined in section 401(9) of the McKinney-Vento Assistance Act (42 U.S.C. 11360(9)) who lives in a place not meant for human habitation, a safe haven, or in an emergency shelter and has been homeless for at least twelve months; an individual who has been residing in an institutional care facility for less, including jail, substance abuse or mental health treatment facility, hospital, or similar facility, for fewer than 90 days and met all of the criteria of this definition before entering that facility; or a family with a head of household who meets all of the criteria, including a family whose composition has fluctuated while the head of household has been homeless.¹² There were 21 chronically homeless individuals within the Consortium communities accounted for in the BoS CoC HMIS as of November 2022, all of whom were in Emergency Shelter. While HMIS does not list any Street Outreach clients for the Consortium communities, when looking at the CoC region, 15 percent of the 190 chronically homeless individuals were Street Outreach clients (i.e., unsheltered).¹³

Veterans

The November 2022 HMIS report tallied fewer than five homeless veteran clients receiving HMIS services within in the Consortium communities. However, it is worth noting that there are no HMIS Street Outreach data for the Consortium communities, which means that unsheltered veterans will not be included in the HMIS data. While there are no shelter or transitional housing projects within the Consortium dedicated to veterans, according to the 2022 Housing Inventory Count (HIC), 130 beds of Permanent Supportive Housing and Other Permanent Housing are located in Bedford.¹⁴

¹² Department of Housing and Urban Development. "Definition of Chronic Homelessness." HUD Exchange. Accessed November 2022 at <https://www.hudexchange.info/homelessness-assistance/coc-esg-virtual-binders/coc-esg-homeless-eligibility/definition-of-chronic-homelessness/>.

¹³ Balance of State Continuum of Care 2022 November 2022 HMIS Report

¹⁴ See pages 35-36 for detailed definitions of project types, including Permanent Supportive Housing and Other Permanent Housing.

Youth and Young Adults

HMIS reports 239 children under 18 years of age in Emergency Shelter or Transitional Housing within the Consortium, making this age group the most represented among HMIS clients. In addition, HMIS reports 52 young adults between the ages of 18 and 24, with 67 percent in Emergency Shelter and the remaining 33 percent in Transitional Housing.

McKinney-Vento data also provides information regarding youth homelessness. The Massachusetts Department of Elementary and Secondary Education (DESE) tracks McKinney-Vento data to ensure the enrollment, attendance, and success of homeless youth in each school district. Students are entered into the data collection system based on their district enrollment; therefore, students sheltered in the district community but transported back to their school of origin in another district are not included. Under McKinney-Vento, students who are doubling up with another family or staying in a hotel/motel are considered homeless. This definition does not qualify them as homeless for purposes of the PIT count or qualifying for certain HMIS programs (unless the hotel or motel stay is provided in lieu of shelter beds due to capacity issues). This explains why the numbers are significantly higher than those reported in HMIS. In 2021-2022, districts from the thirteen Consortium communities reported between 1,286-1,241 homeless students, 77 percent of whom were doubling up.¹⁵ **Table 7** shows the number of reported McKinney-Vento students by district for the Consortium. Cells with data representing fewer than 10 students are suppressed, so a range is provided for the total.¹⁶

Table 7. Homeless Youth Enrolled in Public Schools, 2021-2022

District	# of Students	District	# of Students
Bedford	<10	Needham	23
Belmont	<10	Newton	67
Brookline	35	Sudbury	9
Concord	9	Waltham	130
Framingham	922	Watertown	13
Lexington	16	Wayland	9
Natick	35	TOTAL	1,286-1,241

Source: Massachusetts Department of Elementary and Secondary Education

¹⁵ McKinney-Vento count for youth staying in shelter or in a hotel/motel for 2021-2022 is ≈254, which more closely approximates HMIS data.

¹⁶ Massachusetts Department of Elementary and Secondary Education, 2021-2022 McKinney Vento Homeless Data Report. Report shared by email from the Department on September 20, 2022.

AT RISK OF HOMELESSNESS AS DEFINED IN 24 CFR 91.5

Those considered at risk of homelessness per CPD Notice 21-10 are households: with an annual income below 30 percent of AMI; who do not have sufficient resources or support networks immediately available to prevent them from moving to an emergency shelter; and who meet certain specific living conditions such as exiting a publicly funded institution, living in a hotel/motel, undergoing eviction, moving two or more times in the past 60 days, and more. There are also specific definitions for households with children who do not qualify under the section but qualify under other federal definitions. The best available data on those making 30 percent AMI (considered “extremely low-income” or ELI) is the Comprehensive Housing Affordability Strategy (CHAS) data. CHAS data are custom tabulations of American Community Survey (ACS) data from the U.S. Census Bureau that demonstrate the extent of housing problems and housing needs for low-income households. It is used by governments to plan how to spend HUD funds and may also be used by HUD to distribute grant funds.¹⁷ CHAS 2019 data shows an estimated 22,780 extremely low-income (ELI) households in the Consortium, or 12 percent of total households. **Table 8** shows this distribution by community, and **Map 2** shows the geographic distribution of all ELI households by community. Brookline, Framingham, and Waltham households are significantly more likely to be extremely low income than the other Consortium communities.

Table 8. Households with Incomes <30% AMI (ELI Households)

Community	All Households	Households with Incomes ≤30% AMI (ELI)		
		Total	Owners	Renters
Bedford	5,310	7.7%	3.6%	4.1%
Belmont	9,820	11.1%	4.9%	6.2%
Brookline	24,435	16.2%	3.2%	13.1%
Concord	6,635	7.9%	2.5%	5.4%
Framingham	28,220	16.6%	3.5%	13.1%
Lexington	11,810	9.0%	4.3%	4.7%
Natick	14,535	10.9%	4.6%	6.3%
Needham	10,800	7.5%	3.1%	4.3%
Newton	30,655	9.6%	3.8%	5.8%

Table 8. Households with Incomes <30% AMI (ELI Households)

Community	All Households	Households with Incomes ≤30% AMI (ELI)		
		Total	Owners	Renters
Sudbury	6,385	5.9%	4.6%	1.3%
Waltham	23,690	13.1%	3.9%	9.1%
Watertown	15,620	12.1%	4.8%	7.3%
Wayland	4,785	7.6%	3.9%	3.8%

Source: 2015-2019 CHAS

Map 2. ELI Households by Community

ELI households are also much more likely to experience a HUD-defined housing problem, including: incomplete kitchen facilities; incomplete plumbing facilities; overcrowding; and cost burden greater than 30 percent (or greater than 50 percent as severe cost burden).¹⁸ Nearly three-quarters of WestMetro HOME Consortium ELI householders experience at least one housing problem compared to 31 percent of total Consortium households.¹⁹ **Table 9** provides a Consortium-wide overview of households with housing problems by income.

¹⁸ Cost burden refers to the amount of household income spent on housing costs. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost refers to “select monthly owner costs,” which includes mortgage payment, utilities, association / condo fees, insurance, and real estate taxes. Households are said to be cost-burdened when they pay more than 30 percent of household income toward housing, and severely cost-burdened when they pay more than 50 percent of household income toward housing. Overcrowding refers to having more than one person per room, and severe overcrowding refers to having more than 1.5 persons per room.

¹⁹ U.S Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS), 2015-2019.

Table 9. Consortium Households by Income and Presence of Housing Problems

	Households with 1+ Housing Problem(s)	Total Households	Percent
Household Income ≤30% AMI	16,820	22,780	73.8%
Household Income 31% to 50% AMI	13,595	18,120	75.0%
Household Income 51% to 80% AMI	13,035	23,470	55.0%
Household Income 81% to 100% AMI	5,839	15,980	36.5%
Household Income >100% AMI	10,790	112,375	9.6%
Total	60,040	192,700	31.2%

Source: CHAS 2015-2019

Disability Status

Households where a member has a disability are particularly vulnerable. Across the Consortium, an estimated 12 percent of all households are ELI and experiencing at least one housing problem.²⁰ Among households where no householders have a disability, only 7 percent of households are ELI with at least one housing problem; by comparison households of the four HUD-defined disability types range from 16 to 18 percent ELI with at least on housing problem, as shown in **Figure 2**. For reference, an estimated 18 percent of all households in the Consortium have a household member with a disability.

Figure 2. ELI with 1+ Housing Problem(s) as Percent of Household with Disability by Type

Source: CHAS 2015-2019

²⁰ Ibid.

Race and Ethnicity

Across the Consortium, minority households are disproportionately more likely to either be extremely low income, or extremely low income with at least one severe housing problem. **Table 10** highlights the percentage of ELI or ELI with at least one housing problem among racial or ethnic groups. Black and Hispanic households are more likely to be ELI than all households combined (20.2 percent, 18.8 percent, and 11.5 percent respectively), and Black households are more likely to be ELI with at least one housing problem than all households combined (12.4 percent and 6.4 percent, respectively).

Table 10. Consortium ELI Households with 1+ Housing Problem(s) by Race

		Race/Ethnicity as % of Households	ELI Households	ELI Households w/ 1+ Housing Problem(s)
Non-Hispanic	White	76.8%	10.8%	6.6%
	Black or African-American	2.9%	20.2%	12.4%
	Asian	12.4%	12.6%	7.3%
	American Indian or Alaska Native	0.1%	12.0%	12.0%
	Pacific Islander	0.0%	0.0%	0.0%
	Hispanic, any race	5.8%	18.8%	1.3%
	Total	--	11.5%	6.4%

Eviction Filings

The frequency of evictions also indicates a community’s level of need, particularly when compared to the percentage of renter households. **Figure 3** displays the number of eviction filings during the 2022 calendar year, although these filings may not have resulted in evictions. Framingham had both the highest number of eviction filings during the 2022 calendar year, as well as the highest rate of evictions as compared to their renter estimated households at 4.4 percent. Concord had the lowest rate of filings compared to renter households at 0.2 percent.²¹

²¹ Estimated renter households from American Community Survey 5-Year Estimates, 2017-2021, Table B25003; eviction filings are from MassLandlords, Inc and are available at <https://masslandlords.net/policy/eviction-data/filings-year-ending-2022-12-31/>

**Figure 3. Eviction Filings by Community,
Calendar Year Ending December 31, 2022**

Source: MassLandlords, Inc.

(Note: Court filings have not necessarily resulted in evictions)

FLEEING, OR ATTEMPTING TO FLEE, DOMESTIC VIOLENCE, DATING VIOLENCE, SEXUAL ASSAULT, STALKING, OR HUMAN TRAFFICKING, AS DEFINED BY HUD IN THE NOTICE

For domestic violence, HUD includes cases where an individual or family believes that there is a threat of imminent harm from further violence due to dangerous or life-threatening conditions, including a child, that has taken place within the primary nighttime residence or has made the individual or family afraid to return or remain within the same dwelling unit in this definition of qualifying population. For sexual assault, this includes cases where an individual believes there is a threat of imminent harm from further violence if the individual remains within the same dwelling unit they are currently occupying, or the sexual assault occurred on the premises during the 90-day period preceding the date of the request for transfer. Human trafficking includes both sex and labor trafficking, as outlined in the Trafficking Victims Protection Act of 2000 (TVPA).

In their FY2020 Annual Report, REACH reported serving all Consortium communities except Framingham in some capacity. For all communities served, REACH provided 5,344 bed nights at its Emergency Shelter (averaging 14.6 DV survivors sheltered per night), answered 1,385 hotline calls, accompanied 178 survivors to court, and provided support to 301 adults clients.²² In 2022, SMOC provided 1,900 individuals with domestic and sexual violence counseling and prevention programs through its Voices Against Violence (VAV) program, and seven of its 12 ES

²² REACH Beyond Domestic Violence, *Annual Report FY2020*. Accessed February 2023 at <https://reachma.org/wp-content/uploads/2021/09/Annual-Report-FINAL.pdf>

beds were occupied on the night of the 2022 PIT.²³ The Second Step reports assisting an average 58 DV survivors at any given time in its residential programs.²⁴ On the night of the PIT, all ten of its RRH beds were occupied, as well as four of its thirteen available family TH units and three of its available single adult TH units.²⁵

RIA House in Framingham provides services to victims of human trafficking. In 2021, RIA assisted 118 victims through its services, which include peer mentorship, therapy, case management, and support groups. They report having 43 new clients in 2021.²⁶ Statewide data on human trafficking is also available through the Human Trafficking Hotline. This resource is operated by Polaris and supported by the United States Department of Health and Human Services and tracks reports by state across the nation. The hotline has tracked 2,650 reports relating to human trafficking connected to Massachusetts since its inception in 2007. These reports have led to the identification of 905 cases of human trafficking and 1,703 victims.²⁷ The hotline does not provide County-level or local data.

OTHER POPULATIONS REQUIRING SERVICES OR HOUSING ASSISTANCE TO PREVENT HOMELESSNESS AND OTHER POPULATIONS AT GREATEST RISK OF HOUSING INSTABILITY, AS DEFINED BY HUD IN THE NOTICE.

“Other Populations” include households where providing supportive services or assistance would prevent the family’s homelessness or would serve those with the greatest risk of housing instability. This population includes households who do not qualify under the populations above but either:

- previously qualified as “homeless,” are housed due to temporary or emergency assistance, and need additional assistance or supportive services to avoid homelessness;
- have an annual income less than 30 percent AMI (Extremely Low Income, or ELI) and are severely cost burdened; or

²³ South Middlesex Opportunity Council, *2022 Annual Report*. Accessed February 2023 at <https://www.smoc.org/pdf/Annual%20Report%202022.pdf>; Balance of State Continuum of Care 2022 Point-in-Time (PIT) Count

²⁷ National Human Trafficking Hotline, “Massachusetts; All Time Statistics (Since 2007).” Accessed January 2023 at <https://humantraffickinghotline.org/en/statistics/massachusetts>

- have an annual income less than or equal to 50 percent AMI (Very Low Income, or VLI) and meets certain conditions.²⁸

As with “At-Risk” populations, CHAS data is the primary sources available to analyze qualifying populations in this category. Fifteen percent of Consortium households (29,265) are experiencing a severe housing problem, with 54 percent of those households being renters.²⁹

Table 11 below narrows this data further to ELI and VLI households by tenure and shows that ELI owner households are more likely to be experiencing a severe housing problem than renters, whereas among VLI households, renters are more vulnerable.

Table 11. Consortium ELI & VLI Households with Severe Housing Problems by Tenure

	# Households	# Households w/ 1+ Severe Housing Problem(s)	% Households w/ 1+ Severe Housing Problem(s)
ELI Renter Households	15,350	8,385	54.6%
ELI Owner Households	7,430	5,385	72.5%
All ELI Households	22,780	13,770	60.4%
VLI Renter Households	10,075	4,345	43.1%
VLI Owner Households	8,045	2,875	35.7%
All VLI Households	18,120	7,220	39.8%

Source: CHAS 2015-2019

Figure 4 shows the percentage of all households for each of the thirteen Consortium communities that are ELI or VLI with at least one severe housing problem. Brookline, Framingham, and Waltham have the highest percentages of households who are ELI and experiencing at least one severe housing problem, and Framingham, Waltham, and Natick have the highest percentages of households who are VLI and experiencing at least one severe housing problem.

²⁸ Condition may include exiting a publicly funded institution, living in a hotel/motel, undergoing eviction, moving two or more times in the past 60 days, and more. A complete list of conditions is listed in the CPD Notice 21-10.

²⁹ HUD-defined housing problems include incomplete kitchen facilities; incomplete plumbing facilities; overcrowding; and cost burden greater than 30 percent (or greater than 50 percent as severe cost burden).

Figure 4. ELI and VLI Households w/ 1+ Severe Housing Problem(s) as Percent of Total Households

Severely cost-burdened ELI households are considered a Qualifying Population under “Other populations” defined in Notice CPD 21-10. Severe cost burden means that a household is paying more than half of their income toward select housing costs. **Table 12** outlines the incidence of cost burden among ELI and VLI households across the Consortium, while **Map 3** indicates the concentration of severely cost burdened ELI households in relation to total households within each community. The CHAS data relays how prevalent this issue is, with 59 percent of ELI households and 36 percent of Very Low Income (VLI) households paying more than half of their income toward housing costs. Across all income levels, an estimated 13 percent of the Consortium’s total households are severely cost-burdened.³⁰

Table 12. WestMetro Households by Income, Tenure, and Cost Burden

	Renter Households			Owner Households			All Households		
	Severely Cost-Burdened	Total	Percent	Severely Cost-Burdened	Total	Percent	Severely Cost-Burdened	Total	Percent
≤ 30% AMI (ELI)	8,005	15,350	52.2%	5,360	7,430	72.1%	13,365	22,780	58.7%
>30-50% AMI (VLI)	3,805	10,075	37.8%	2,655	8,045	33.0%	6,460	18,120	35.7%

Source: CHAS 2015-2019

³⁰ Source: U.S Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS), 2015-2019.

Certain household types are significantly more likely to be ELI and severely cost-burdened than others. Across the Consortium, small families are the most common household type, defined as either two persons both under 62 years old, or a family with 3-4 members (ages undefined), and large families (5 or more persons) are the least common household type. In general, family household types are much less likely to be ELI and severely cost-burdened than non-family household types. Elderly non-family households (typically a single older adult or perhaps older non-family adults living as roommates) are the most likely to have extremely low incomes *and* be severely cost burdened, as shown in **Table 13**. This is an important consideration when planning for unit types and sizes for Qualifying Populations.

Map 3. ELI & Severely Cost-Burdened Households by Community

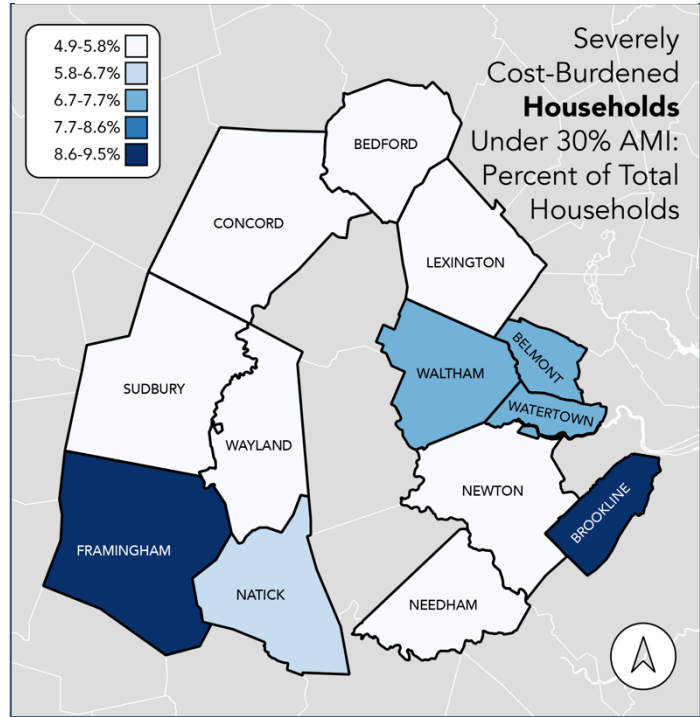

Table 13. Consortium ELI and VLI Households by Household Type

	% Household Type ELI and Severely Cost-Burdened	% Household Type VLI and Severely Cost-Burdened	Household Type as % of Total Households
Elderly Family (2 ppl, either or both 62+)	3.9%	2.5%	15.3%
Small Family (2 ppl, neither person 62+, or 3-4 ppl)	3.7%	2.0%	44.4%
Large Family (5+ ppl)	3.3%	0.9%	6.4%
Elderly Non-Family	17.0%	6.7%	14.5%
Other Household Type (non-elderly, non-family)	10.4%	4.8%	19.4%

Source: CHAS 2015-2019.

Identify and consider the current resources available to assist qualifying populations, including congregate and non-congregate shelter units, supportive services, TBRA, and affordable and permanent supportive rental housing.

The WestMetro HOME Consortium has multiple programs, financial resources, shelter beds, units, and other resources available to assist qualifying populations within its five communities:

CONTINUUM OF CARE

In December 2016, the Brookline-Newton-Waltham-Watertown Continuum of Care merged with the Massachusetts Balance of State Continuum of Care (BoS CoC). Since this merger, all WestMetro HOME Consortium communities are now part of the BoS CoC (see **Map 1**).

Continuums of Care are responsible for compiling and reporting a Housing Inventory Count, or HIC. This annual inventory tallies beds and units available for those who are homeless or in permanent supportive housing. Types of projects include the following:³¹

- Emergency Shelter (ES) means any facility with the primary purpose of providing a temporary shelter for the homeless and which does not require occupants to sign leases or occupancy agreements.
- Transitional Housing (TH) projects facilitate the movement of homeless individuals and families to permanent housing within a reasonable amount of time (usually 24 months). Transitional Housing provides temporary housing with supportive services to individuals and families experiencing homelessness with the goal of interim stability and support to successfully move to and maintain permanent housing.
- Permanent Housing (PH) is a community-based housing model, the purpose of which is to provide housing without a designated length of stay. PH program participants must be the tenant on a lease (or sublease) which: has an initial term of at least one year; is renewable for a minimum term of one month; and is terminable only for cause. Permanent Housing includes:
 - Permanent Supportive Housing (PSH): permanent housing in which housing assistance (e.g., long-term leasing or rental assistance) and supportive services are provided to assist households with at least one member (adult or child) with a disability in achieving housing stability.

³¹ U.S. Department of Housing and Urban Development, "CoC Program Components Overview." Accessed February 2023 at <https://www.hudexchange.info/homelessness-assistance/coc-esg-virtual-binders/coc-program-components/coc-program-components-overview/>

- Rapid Re-housing (RRH): permanent housing that provides short-term (up to three months) and medium-term (4-24 months) tenant-based rental assistance and supportive services to households experiencing homelessness.
- Other Permanent Housing (OPH): permanent housing that is neither PSH or RRH and may or may not include services for those without disabilities.

The 2022 HIC report for the BoS CoC lists 7,053 total year-round beds. Of these, an estimated 1,197 are located within the WestMetro HOME Consortium communities in 41 different projects. There are an additional 103 overflow beds for families, as well as 15 seasonal beds for adults. **Table 14** in the next section provides additional detail about the types and numbers of beds within the Consortium.

The Massachusetts Department of Housing and Community Development (DHCD) is the Collaborative Applicant for the CoC, which means it submits the CoC's Consolidated Application for annual funding to HUD. DHCD is also the Homeless Management Information System (HMIS) Lead for the CoC. The BoS CoC is divided into four regions for managing its Coordinated Entry System (CES), a process for assessing the needs of new homeless or at-risk clients and connecting them to services, shelter, or housing.

The BoS CoC applies to HUD for annual funding using a collaborative application that includes project funding requests ranked by the CoC'S Ranking and Review Committee. The Committee uses a standardized ranking tool adopted by the CoC and adjusted annually as needed.³² The BoS CoC was awarded \$23,903,388 to fund 48 projects in FY2021 and applied for \$23,852,777 for FY2022.

EMERGENCY SOLUTIONS GRANT (ESG)

Over the past three years, Newton has been awarded an average of \$165,069 annually in ESG funds, not including CARES Act ESG funds, which totaled \$1.4M. Newton generally awards these ESG funds to five recipients: Brookline Community Mental Health Center, Community Day Center of Waltham, Middlesex Human Service Agency, REACH Beyond Domestic Violence, and The Second Step, Inc. The ESG funds support the nonprofit organizations' emergency shelter for homeless individuals; transitional housing and supportive services to survivors of domestic violence and their families; and case management and supportive services to assist those at risk of homelessness and to help house homeless individuals and families.³³ The Consortium's

FFY2021-2025 Consolidated Plan includes a goal of using an estimated \$838,670 over five years for supportive services for those experiencing or at risk of homelessness.³⁴

HOME INVESTMENT PARTNERSHIPS PROGRAM

Since its inception in 1992, the WestMetro HOME Consortium has provided grants and loans of HOME funds to create over 550 units of affordable housing.³⁵ The Consortium’s FFY2021-2025 Consolidated Plan includes goals for HOME-funded projects including but not limited to TBRA (\$2.3M), rehabilitation of existing units (\$4.4M), and production of affordable units (\$2.9M).³⁶ The City of Newton’s FFY2021 Consolidated Annual Performance and Evaluation Report (CAPER) reiterates this focus, noting that for FFY2021 the Consortium focused on three goals: TBRA, rehabilitation of existing units, and production of affordable units. The CAPER also notes that there are several HOME-assisted affordable housing projects in the pipeline at various stages of development that will be completed in subsequent years.³⁷

COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG)

There are four entitlement communities within the Consortium – Brookline, Framingham, Newton, and Waltham. These communities receive annual Community Development Block Grant (CDBG) funds, which can be used for affordable housing acquisition and social services for low- and moderate-income residents, among other activities. **Figure 5** displays the 3-year average of CDBG funds received by the Consortium’s four entitlement communities from 2019-2021.

PUBLIC HOUSING AUTHORITIES³⁸

Regionally, the Consortium’s thirteen public housing authorities provide a significant source of affordable housing. There are approximately 5,500 public housing units Consortium-wide, of which 4,420 are accessible to persons with disabilities. Local housing authorities also administer housing vouchers programs, which subsidize rent and utilities in eligible private housing.

REGIONAL HOUSING SERVICES OFFICE

Bedford, Concord, Lexington, Sudbury, and Wayland are all members of the Regional Housing Services Office (RHSO), an entity established by interlocal agreement of nine communities to provide for local housing-related support, monitoring and inventory management, program development and administration, trainings, and more.³⁹

REGIONAL ADMINISTERING AGENCIES

Massachusetts is broken into nine Regional Administering Agency (RAA) regions. RAAs work with DHCD to oversee the administration of various assistance programs including federal Section 8 rental vouchers, the Massachusetts Rental Voucher Program (MRVP), and Residential Assistance for Families in Transition (RAFT), which provides financial assistance for rent, utilities, or moving costs. RAAs serving the Consortium include SMOC and Metro Housing Boston.

SHELTER, HOUSING, AND SERVICE PROVIDERS

The WestMetro HOME Consortium has numerous shelter, housing, and service providers that work with Qualifying Populations. **Table 14** lists primary providers of shelter or permanent housing within the WestMetro HOME Consortium. REACH and South Middlesex Opportunity Council (SMOC) are the only providers of Emergency Shelter (ES) beds for domestic violence victims within the Consortium, although Newton Housing Authority and the Second Step, provide Transitional Housing (TH), Rapid Re-Housing (RRH), and Other Permanent Housing (OPH) beds for a total of 116 beds dedicated for DV survivors.⁴⁰ For the 2022 PIT count, 21 DV ES beds were utilized.⁴¹

⁴² The locations listed in Table 15 may not reflect a project's physical address, as some projects are scattered site projects or have confidential locations.

In addition to the developers of permanent housing listed above, other nonprofit housing developers include Newton Community Development Foundation, MetroWest Collaborative Development, Friends of 2Life Communities, Brookline Community Development Corporation, Citizens for Affordable Housing Development in Newton Development Organization (CAN-DO), and B’Nai Brith Housing. There are numerous service providers within the Consortium, including but not limited to the Boys & Girls Club, WATCH CDC, Brookline Center for Community Mental Health, Riverside Community Care, and African Cultural Services. Legal and mediation services include MetroWest Mediation and Housing Families. RIA House is a highly specialized provider focused on case management and other services for victims of human trafficking.

The Community Engagement Plan included in the Appendix includes a more complete list of organizations within the WestMetro HOME Consortium or that service the Consortium communities.

Describe the unmet housing and service needs of qualifying populations.

Qualifying Populations (QPs) include:

- Homeless as defined in 24 CFR 91.5
- At Risk of Homelessness as defined in 24 CFR 91.5
- Fleeing, or Attempting to Flee, Domestic Violence, Dating Violence, Sexual Assault, Stalking, or Human Trafficking, as defined by HUD in the Notice
- Other populations requiring services or housing assistance to prevent homelessness and other populations at greatest risk of housing instability as defined by HUD in the Notice

AFFORDABLE RENTAL UNITS

The unmet needs of all qualifying populations are largely rooted in the lack of an affordable and diverse housing inventory across the Consortium, which drives up the cost of housing and makes it difficult to move QPs from shelter into permanent housing. Providers and members of QPs alike report the challenges of transitioning from shelter into safe, stable, affordable housing because there simply are not enough units to meet the needs of these vulnerable populations. The lack of housing options contributes to extremely long wait lists for PHAs, vouchers, and emergency shelters, and has created a highly competitive selection process for getting into even market rate units. Several providers and members of Qualifying Populations reported that landlords are less likely to select applicants with lower credit scores, those who cannot pass a background check, homeless individuals even if they are employed, or voucher holders; the rental market is extremely competitive, and landlords often have many applicants from whom to choose. Being able to move clients into units they can afford *quickly* means that service providers

would be able to direct more specialized attention to highly vulnerable populations not yet ready for permanent housing.

NON-CONGREGATE SHELTER

Beyond the general lack of affordable rental units, the Consortium’s shelter resources are concentrated within a few communities. Most of the Consortium’s 591 ES beds are in or associated with Framingham (450, 333 of which are scattered site), with Waltham (76 beds) and Brookline (51) also hosting a significant number. In addition, several people experiencing homelessness revealed that congregate adult shelters without sobriety requirements — while filling a necessary and important need for low-barrier shelter — do not provide an ideal setting for healing, particularly for those in recovery.⁴³

TENANT-BASED RENTAL ASSISTANCE

Many providers as well as municipal staff stressed the importance of Tenant-Based Rental Assistance, or TBRA. Waltham and Framingham both operate TBRA programs and reported that additional resources to support these programs would allow them to assist more households. Using FY2020 HOME funds, Framingham assisted an estimated 10 households with security deposit assistance and 7 households with rental assistance for at least twelve months. Waltham assisted an estimated 29 households with security deposits and 19 households with rental assistance for at least twelve months.⁴⁴

Some providers also noted that recent changes to the state’s RAFT program have made it much more challenging for households to receive assistance.⁴⁵ Consultation partners noted that families now need to be on the brink of homelessness (e.g., having received an eviction notice) to receive RAFT whereas that previously was not required. This means that households need to be at a point of imminent crisis before getting this assistance. Metro Housing Boston, the Regional Administering Agency for several WestMetro HOME Consortium communities, reported that some more affluent towns are experiencing increasing need based upon RAFT applications. For FY2022, Metro Housing Boston assisted 82 Brookline households with RAFT, spending just over \$700,000 in rental assistance. In Belmont, Metro Housing Boston assisted 71 households, spending just over \$650,000 in rental arrears alone. Watertown saw significant need,

⁴³ The 2022 HIC lists 14 Rapid Re-Housing (RRH) beds for DV survivors provided by Family & Community Resources, Inc. (FCR). FCR indicates that they provide Transitional Housing for DV survivors, but these beds are not included in the HIC. Source: Family & Community Resources, Inc., “Transitional Housing for Survivors.” Access on February 10, 2023 at <https://www.fcr-ma.org/housing-project>.

⁴⁴ Report provided by the City of Newton Housing and Community Development Office, February 1, 2023.

⁴⁵ RAFT: Residential Assistance for Families in Transition

with 166 households receiving RAFT, totaling just over \$1.6M in both rental assistance and arrears. In terms of demographics, Metro Housing Boston noted an increase in single adults, women in particular, aged 50-60+ who have lost their jobs and are not yet eligible for social security.

SUPPORTIVE SERVICES

Case Management

While lack of units drives many issues discussed in this Allocation Plan, vulnerable populations whose basic needs are not being met may struggle to navigate the challenging system of waitlists, applications, seeking out available resources, and more. The consultation process revealed a lack of wrap-around case management services to streamline connections between service providers, largely due to capacity issues. Filling out applications, tracking down services, gathering documents, repeatedly having to share personal stories, and other roadblocks add stress for those experiencing the trauma of homelessness — especially when those efforts do not result in basic needs being met. Wrap-around consistent and compassionate case management can reduce these repetitive and stressful procedural barriers for Qualifying Populations in need of support.

Housing Search Assistance

Members of Qualifying Populations specifically raised the need for housing search assistance; one person experiencing homelessness described how they cannot even get “their foot in the door” at unit showings, and a service provider reported that those searching for housing often must resort to paying for a broker, adding yet another cost for vulnerable households to incur. Qualifying Populations would benefit from having an advocate who not only helps them search and apply for units, but also act as a liaison connecting them to landlords.

Financial and Other Assistance

Both providers and members of Qualifying Populations shared how valuable financial assistance can be in allowing households to “stay afloat” by taking other non-housing expenses off the table, such as transportation, food assistance, childcare, and more.

Other Supportive Services

Service providers, municipal staff, and PHA staff discussed an increase in supportive service needs ranging from immigrant services, translation assistance, transportation, childcare, treatment for substance use disorders, mental health counseling, legal representation, and more.

Identify any gaps within the current shelter and housing inventory as well as the service delivery system.

SHELTER, TRANSITIONAL, AND SUPPORTIVE INVENTORY

Table 15 below utilizes numeric data from the Housing Inventory Count (HIC) and Point-In Time (PIT). The data used to create this table are specific to the WestMetro HOME Consortium and were compiled with assistance from the Balance of State Continuum of Care.

Table 15. Homeless Needs Inventory and Gap Table

	Current Inventory						Homeless Population				Gap Analysis		
	Family		Adults Only	Vets	Victims of DV		Family HH (1+ child)	Adult HH (w/o child)	Vets	Victims of DV	Family		Adults Only
	Beds	Units	Beds/Units	Beds/Units	Beds	Units ⁴⁶					Beds	Units	Beds/Units

Sheltered Homeless							157 HH/ 476 ppl	79	<5	>26 HH/ 47 ppl			
Unsheltered Homeless							0	53	Unknown	Unknown			
Total ES & TH Only⁴⁷	504	174	76	0	96	36	157 HH/ 476 ppl	132	<5	Unknown			
Current Gap											+28 beds	+17 units	-56 beds

Data Sources: Balance of State CoC: 2022 Point in Time Count (PIT), 2022 Housing Inventory Count (HIC), and HMIS November 2022 Report
Notes for Inventory Columns: All numbers for beds are year-round figures. There are an additional 103 overflow family beds not included in this table, as well as 15 seasonal adult beds. DV victim beds have been separated out from the family and adult bed totals. DV units include units for households with and without children.
Notes for Homeless Population Columns: The unsheltered homeless counts by community were provided by the Balance of State CoC. Consortium-level PIT data did not indicate veteran status; the veteran figure in this table comes from HMIS, reported November 2022.
Notes for Gap Analysis Columns: Those in PSH, OPH, and RRH are not considered currently homeless, so beds under those programs are not used to calculate gaps for currently homeless households.

Based on **Table 15**, the Consortium *appears* to have a surplus in the number of family beds. However, multiple providers emphasized the PIT’s data limitations: PIT counts only account for one night of the year, do not count those who are “doubling up” or living in a hotel/motel

⁴⁶ DV units include units for households with children and households without children
⁴⁷ Those in PSH, OPH, and RRH are not considered currently homeless, so beds under those programs are not used to calculate gaps for currently homeless households.

without assistance, and may undercount those living in their cars or in another uncaptured setting not fit for human habitation. Among the Consortium communities, there were 951 students reported as “doubling up” with other families to the Massachusetts Department of Elementary and Secondary Education.

In addition, Massachusetts is a right-to-shelter state, which means adults with a dependent minor who qualify for shelter must be housed, whether in an actual shelter or in another facility. Emergency Assistance (EA) shelters for families with children are funded and administered by the Massachusetts Department of Housing and Community Development (DHCD). All referrals come through DHCD, and clients are placed through a statewide by-name list. While DHCD has a policy of keeping families within a 20-mile radius of their current community, this is subject to availability, and clients can be sent wherever there is an opening; thus, Consortium families in need of emergency shelter would not necessarily be placed in the Consortium’s several EA shelters - five SMOC EA shelters located in Framingham, scattered site SMOC EA shelter beds, Mary’s House in Waltham, FamilyAid Boston in Brookline, and BoS CoC overflow hotel beds.⁴⁸ Family shelter beds can also seem deceptively high because the beds assigned to a unit represent a maximum number of household members that could fit; if a family has only 2 members but is placed in a 5-bed unit, those three beds will not be utilized because there is a 1 family per 1 unit ratio.

HOUSING INVENTORY

While there is a demand in the region for housing at a range of income levels, for HOME-ARP Qualifying Populations, there is currently an estimated gap of 1,840 units affordable to ELI and VLI renter households, as shown in **Table 16. Figure 6** demonstrates the mismatch between renter households at varying income levels compared to the affordability of the units they are housed in. An estimated 56 percent of ELI renter households and 42 percent of VLI renter households are housed in units they cannot afford.⁴⁹ This mismatch can occur when lower income households have no choice but to take whatever unit they can get regardless of cost, as well as when households with higher incomes occupy lower-rent units that are not deed-restricted for occupancy by eligible households.

⁴⁸ Family Promise MetroWest in Natick is also a family shelter, but is not managed through the state.

⁴⁹ *U.S Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS), 2015-2019. Calculation derived from Tables*

Table 16. WestMetro Estimated Unit Gaps for ELI and VLI Renter Households.

Income Level	Rental Units Affordable to Income Level	Total Renter Households	Gap Analysis
≤ 30% AMI (ELI)	11,543	15,350	-3,807 Units
30-50% AMI (VLI)	9,254	10,075	-821 Units
Total ELI and VLI	20,797	25,425	-4,628 Units

Source: CHAS 2015-2019

Source: CHAS 2015-2019

⁵⁰ CHAS data do not break down unit affordability beyond greater than 80% AMI. Therefore, precise affordability mismatch cannot be determined for households 80-100% AMI.

Identify additional characteristics associated with instability and increased risk of homelessness included in the PJ’s definition of “other populations.”⁵¹

The WestMetro HOME Consortium will not include additional conditions to define “other populations.”

Identify priority needs for qualifying populations.

While the Consultation and Public Participation processes, Needs Assessment, and Gaps Analysis highlighted significant needs in terms of shelter, housing, service delivery, financial assistance, and more, the core issue facing QPs is the need for various types of deeply affordable rental housing for vulnerable households. Moving homeless, at-risk, and other qualifying populations into suitable housing will provide these households with the stability necessary to focus on other needs they may be experiencing. Beyond this core issue, the needs vary considerably based on population. Those experiencing homelessness could benefit from increased non-congregate shelter capacity; some members of Qualifying Populations spoke about how unhealthy the congregate shelter environment can be for them, especially if they are in recovery or are otherwise vulnerable. In addition, homeless individuals navigating an extremely traumatic time in their lives benefit from compassionate care and consistent, reliable case management that will enable them to secure housing — and successfully remain housed. Supportive services — particularly financial assistance and other homelessness prevention services — would also benefit currently-housed individuals and families who are at risk and perhaps just one catastrophe away from homelessness.

Explain how the PJ determined the level of need and gaps in the PJ’s shelter and housing inventory and service delivery systems based on the data presented in the plan.

Levels of need and gaps in the housing inventory and service delivery system were based on consultation with a variety of providers, those experiencing homelessness, and the general public. In addition, the Consortium reviewed datasets including but not limited to: 2015-2019 CHAS data, 2022 PIT Counts, 2022 Housing Inventory Counts (HIC), a November 2022 HMIS report prepared by the CoC, 2020-2022 McKinney-Vento data, 2017-2021 American Community Survey (ACS) estimates, Public Housing Authority data, and other miscellaneous datasets and reports from providers. The Consortium also reviewed its current Consolidated Plan, Analysis of Impediments, and most recent Annual Action Plan and CAPER.

⁵¹ Under Section IV.4.2.ii.G of the HOME-ARP Notice, a PJ may provide additional characteristics associated with instability and increased risk of homelessness in their HOME-ARP allocation plan. These characteristics will further refine the definition of “other populations” that are “At Greatest Risk of Housing Instability.”

HOME-ARP ACTIVITIES

Describe the method(s) that will be used for soliciting applications for funding and/or selecting developers, service providers, subrecipients and/or contractors.

The WestMetro HOME Consortium will allocate HOME-ARP funds through the issuance of Requests for Proposals. All eligible projects may apply. Projects that best meet the needs of the Consortium's qualifying populations, have demonstrated experience with one or more of the eligible activities, and align with the RFP's competitive criteria, HOME-ARP standards, budget requirements, and existing planning efforts (the Annual Action Plan, the Five-Year Consolidated Plan, etc.) will receive priority consideration.

The WestMetro HOME Consortium will form Project Review Committees consisting of representatives from multiple Consortium communities. The Project Review Committees will review all requests for compliance prior to making recommendations to the full WestMetro HOME Consortium for final approval by vote. The final review of responses and award notice dates are to be determined. However, the Consortium hopes to begin the process shortly following Plan approval. As with the regular HOME program, rental developments are subject to underwriting and must include the appropriate requirements in their agreements, including inspections during the minimum affordability and compliance periods. All approved projects are subject to monitoring by the Consortium.

Describe whether the PJ will administer eligible activities directly.

HOME-ARP funding and activities will be directly administered by the WestMetro HOME Consortium through the City of Newton's Housing & Community Development Office, in partnership with the community where the project is taking place.

Identify the subrecipient or contractor responsible for the administration of the PJ's entire HOME-ARP grant and describe its role and responsibilities in administering all of the PJ's HOME-ARP program, if applicable.

The WestMetro HOME Consortium did not and will not allocate funds to a subrecipient or contractor to administer the entirety of the HOME-ARP grant. Upon HUD approval of this Allocation Plan, the Consortium will reimburse itself for approximately 15 percent of its administrative funds to cover the costs of hiring a consultant to draft the HOME-ARP Allocation Plan. Per HUD guidance, PJs may use five percent of the 15 percent administrative cap for staff and other allowed administrative costs before approval to assist with plan compilation and submission and can reimburse itself for allowable consultant fees incurred for Allocation Plan development after HUD plan approval.

Use of HOME-ARP Funding⁵²

Table 17. Use of HOME-ARP Funding

	Funding Amount	Percent of Grant	Statutory Limit
Supportive Services	\$750,000	14%	--
Acquisition and Development of Non-Congregate Shelters	\$1,000,000	18%	--
Tenant Based Rental Assistance (TBRA)	\$300,000	6%	--
Development of Affordable Rental Housing	\$2,545,918	47%	--
Non-Profit Operating	--	0%	5%
Non-Profit Capacity Building	--	0%	5%
Administration and Planning	\$811,044	15%	15%
Total HOME ARP Allocation	\$5,406,962		

Additional Narrative

Using a substantial portion of these one-time HOME-ARP funds for development and rehabilitation of affordable rental housing is one of the most effective strategies to assist Qualifying Populations. Creating additional units will help relieve waiting lists for public housing and project/tenant-based vouchers, and also address housing instability for at-risk households. The other eligible activities, while also critical, cannot succeed unless rental units are available. Shelter guests need suitable units to move into when they are ready for permanent housing, a challenge identified by both members of Qualifying Populations as well as providers.

That said, unit availability is just one piece of the puzzle. Those exiting shelter often need housing search assistance and benefit from having an advocate assist them. This not only helps alleviate the stress of this complex and sometimes frustrating process, but also reassures landlords who can build a rapport with trusted service providers. To provide this level of assistance and support, however, requires consistent, reliable, and compassionate case management.

⁵² In accordance with Section V.C.2. of the Notice (page 4), PJs must indicate the amount of HOME-ARP funding that is planned for each eligible HOME-ARP activity type and demonstrate that any planned funding for nonprofit organization operating assistance, nonprofit capacity building, and administrative costs is within HOME-ARP limits.

Other supportive services identified as a need for those experiencing homelessness include mental health counseling, financial assistance, and more. These services are often critical for helping vulnerable households obtain and *keep* their housing — and they are also contingent upon the availability of case managers, social workers, and healthcare professionals.

Recognizing the concentration of current shelter resources in just a handful of Consortium communities, the WestMetro HOME Consortium has allocated \$1,000,000 of its HOME-ARP funds toward Non-Congregate Shelter. Should the Consortium not receive viable responses to the RFP for Non-Congregate Shelter in a timely manner, NCS funds will be reallocated toward other HOME-ARP activities, through the substantial amendment process if triggered.

Describe how the characteristics of the shelter and housing inventory, service delivery system, and the needs identified in the gap analysis provided a rationale for the plan to fund eligible activities.

The Consultation and Public Participation processes and Needs Assessment and Gaps Analysis indicate the need for increasing the supply of affordable rental housing available to HOME-ARP Qualifying Populations, as well as a variety of supportive services — both to *keep* people housed and to assist those experiencing homelessness. Therefore, rental housing is the most funded activity at 47 percent, with a substantial amount for supportive services that may or may not fund services directly tied to HOME-ARP units. In addition, many providers emphasized the need for flexible TBRA that could make a significant impact for households experiencing crisis by providing a critical lifeline for avoiding eviction, particularly as current TBRA programs lose COVID-related funding and the state’s RAFT program has recently changed its requirements. However, given the one-time nature of these funds, the Consortium did not dedicate a large portion of HOME-ARP funds to TBRA programs and determined 6 percent was reasonable. Lastly, many in the consultation process noted the concentration of emergency resources in just a few communities; while these communities do have the highest levels of need, there are households in *all* Consortium communities at great risk of homelessness. These one-time funds could allow an interested party to pursue the creation of NCS — and potentially later convert the NCS to much-needed permanent housing after the 15-year compliance period.

HOME-ARP PRODUCTION HOUSING GOALS

Estimate the number of affordable rental housing units for qualifying populations that the PJ will produce or support with its HOME-ARP allocation:

The Consortium estimates that its HOME-ARP allocation will support the creation of twelve affordable rental units. While the HOME-ARP program does not have a per-unit subsidy limit, the Consortium anticipates that eligible projects would utilize additional funding sources and is assuming a subsidy of \$200,000 per unit for purposes of this calculation. At least 70 percent of HOME-ARP units within a project would be reserved for members of Qualifying Populations, with up to the remaining 30 percent for LMI households. Should these units be included in larger projects leveraging other funding sources such as Low-Income Housing Tax Credits (LIHTC), other units in the development(s) may not be limited to HOME-ARP QPs.

Describe the specific affordable rental housing production goal that the PJ hopes to achieve and describe how the production goal will address the PJ's priority needs:

This use of HOME-ARP funds aligns with the Consortium's primary HOME/CDBG goal under its FY2023 Annual Action Plan, which is the production of new affordable housing units.⁵³ This is in alignment with the highest priority goal of the FY2021-FY2025 Five-Year Consolidated Plan – the production of new affordable housing units. Goals 2 and 3 also relate to affordable housing – the rehabilitation of existing units and the acquisition of existing units, respectively.⁵⁴

OTHER PLAN ELEMENTS

Preferences

The WestMetro HOME Consortium will not give preferences to one or more Qualifying Populations or subpopulations.

HOME-ARP Refinancing Guidelines

The WestMetro HOME Consortium will not offer refinancing options with HOME-ARP funds.

Newton Planning and Development Board

NOTICE OF PUBLIC HEARING, DOCUMENT AVAILABILITY, AND COMMENT PERIOD

The Planning & Development Board will hold this meeting as a virtual meeting on **Monday, March 6, 2023, at 7:00 pm**. No in-person meeting will take place at City Hall.

To view and participate in this virtual meeting on your computer at the above date and time, visit <https://us02web.zoom.us/j/86798940437>, or visit www.zoom.us, click "Join a Meeting" and enter the following Meeting ID: 867 9894 0437.

To view and participate in this virtual meeting on your smartphone, download the "ZOOM Cloud Meetings" app in any app store or visit www.zoom.us. At the above date and time, click on "Join a Meeting" and enter the following Meeting ID: 867 9894 0437. You may also join the meeting from your smartphone by dialing 1 (305) 224-1968 and entering 86798940437#. For audio only, call 1 (305) 224-1968 and enter Meeting ID: 86798940437#.

PUBLIC HEARING ITEM:

The City of Newton and the WestMetro HOME Consortium, consisting of twelve other member communities (the Towns of Bedford, Belmont, Brookline, Concord, Lexington, Natick, Needham, Sudbury, and Wayland and the Cities of Framingham, Waltham, and Watertown), have prepared a DRAFT HOME-ARP Allocation Plan ("Draft Plan"), which outlines the strategy and planned expenditures of federal HOME-ARP funds from the U.S. Department of Housing and Urban Development (HUD). This one-time allocation must be used to assist a qualifying population of individuals or households who are: homeless; at risk of homelessness; fleeing or attempting to flee domestic violence, dating violence, sexual assault, stalking, or human trafficking; and other vulnerable populations as listed in HUD CPD Notice 21-10, Section IV by providing affordable rental housing, tenant-based rental assistance, supportive services, or non-congregate shelter. The WestMetro HOME Consortium was awarded \$5,406,962 in HOME-ARP funds, which will be administered by the City of Newton. The Draft Plan outlines the activities and goals planned to address the needs of qualifying populations within the Consortium communities. Allocated funds must be spent by September 30, 2030.

The Draft Plan will be available online at <https://www.newtonma.gov/government/planning/housing-community-development> on February 27, 2023. A printed copy of the plan will be available in the Newton Housing & Community Development Office, Newton City Hall, Second Floor. A 15-day public review comment period will take place from March 6, 2023 through March 21, 2023. Comments on the proposed plan will be accepted at the public hearing and in writing to Amanda Berman, Director of Housing and Community Development, Planning and Development Department, 1000 Commonwealth Avenue, Newton, MA, 02459 or via email at aberman@newtonma.gov. The deadline for submitting comments is March 21, 2023, at 5:00 p.m.

If you need a reasonable accommodation, please contact the City of Newton's ADA/Section 504 Coordinator, Jini Fairley, at least two business days in advance of the meeting: jfairley@newtonma.gov or (617) 796-1253. The City's TTY/TDD direct line is: 617-796-1089. For the Telecommunications Relay Service (TRS), please dial 711.

WestMetro HOME Consortium

HOME-ARP Allocation Plan

COMMUNITY ENGAGEMENT PLAN

INTRODUCTION

Through the American Rescue Plan Act of 2021 (ARP), the U.S. Department of Housing and Urban Development (HUD) has awarded **\$5,406,962** to the WestMetro HOME Consortium for housing, services, and shelter to individuals experiencing homelessness or housing instability. The WestMetro HOME Consortium includes Bedford, Belmont, Brookline, Concord, Framingham, Lexington, Natick, Needham, Newton, Sudbury, Waltham, Watertown, and Wayland. The City of Newton is the lead entity.

HUD requires all recipients of HOME-ARP funding to develop a HOME-ARP Allocation Plan. The Allocation Plan requires approval by HUD before the Consortium can receive and begin to commit HOME-ARP funds. To ensure that resources from this one-time funding source address the most pressing homelessness and housing instability needs, the Consortium will conduct broad community outreach to engage stakeholders, advocates, and housing and homelessness service organizations working in our communities. This consultation process, coupled with extensive data collection and analysis, will inform the needs assessment, gap analysis, and implementation program required for the HOME-ARP Allocation Plan.

How can HOME-ARP funds be used?

- Preservation and Production of Affordable Rental Housing
- Tenant-Based Rental Assistance (TBRA)
- Housing-Related Supportive Services
- Acquisition and Development of Non-Congregate Shelters (NCS)
- Non-profit operating assistance or capacity building

What populations are HOME-ARP funds designed to help? Who are “qualifying populations” for this program?

- Homeless, as defined in section 103(a) of the McKinney Vento Homeless Assistance Act
- At risk of homelessness, as defined in section 401 of McKinney Vento
- Fleeing or attempting to escape domestic violence, dating violence, sexual assault, stalking, or human trafficking.
- Supported through services or assistance that otherwise prevent homelessness or risk of housing instability.
- A veteran or a family, including a veteran that meets one or more of the previous criteria.

In addition to assessing the housing and homelessness assistance needs of the program’s target populations, the HOME-ARP Allocation Plan is concerned with these related issues:

- **Equity:** to ensure that individuals with fewer opportunities to access housing resources can benefit from safe, consistent programs that may meet their needs.
- **Community Connectivity:** by evaluating current institutions and housing resources, the plan aims to facilitate communication and coordination among various organizations to help people experiencing housing scarcity capitalize on new and existing programs.
- **Respect & Discretion:** to identify, understand, plan for, and address the needs of individuals with homelessness or housing scarcity without compromising their privacy, safety, and autonomy.

PURPOSES OF COMMUNITY ENGAGEMENT

Community engagement is at the heart of the HOME-ARP Allocation Plan process. When analyzing the needs of qualifying populations, the WestMetro HOME Consortium will consider both existing support institutions and stakeholders. Housing data and institutional resources may show a significant gap in needs; however, the personal and organizational knowledge of people in the Consortium's communities is critical for an effective planning process. Engagement and outreach opportunities will be facilitated through dialogue and participation to:

- **Evaluate** the presence of qualifying populations (listed on page 2 of this document).
- **Identify and involve** the people and organizations with interest in housing solutions.
- **Learn** from those familiar with the housing needs of individuals of those who are homeless, at risk of homelessness, or facing housing instability due to domestic violence.
- **Consult** with faith-based and cultural organizations that provide social services within Consortium to understand existing, successful programs, opportunities, and constraints to housing security.
- **Present recommendations** to the WestMetro HOME Consortium and document feedback from in-person and online outreach methods.
- **Convey the needs assessment results** and outreach efforts to the community, the organizations involved with housing services, and WestMetro HOME Consortium decision-makers.

STAKEHOLDERS, ADVOCATES, ADVISORS, DECISION MAKERS

As used in this engagement plan, "**stakeholder**" means:

- Qualifying populations who are homeless, at risk of being homeless, or defined in the law as another vulnerable population,
- Individuals currently receiving services through the Continuum of Care (CoC), and
- People who experience or have experienced housing insecurity, homelessness, or vulnerability.

Advocates are existing organizations advocating for homeless and vulnerable populations, such as shelter providers, housing organizations, social service agencies, health care agencies and organizations, faith-based community leaders, and others. The initial list of identified advocates and community partners can be found beginning on page 8 of this document.

Community Partners are the elected and appointed officials and professional staff in the Consortium's communities.

Decision Makers include the WestMetro HOME Consortium and the City of Newton's Department of Planning & Community Development.

RESOURCES, SCALE OF ENGAGEMENT, PROJECT SCHEDULE

Community outreach opportunities will advance equity and encourage community conversation. Considerations made to further these intentions include:

- **Equity.** The intentional inclusion of community members who have experienced housing scarcity aims to elevate the voices of those who have faced uncertainty due to various circumstances and are not always included in traditional modes of outreach.
- **Access to Information.** Documents regarding the federal standards of the HOME American Rescue Plan Act and additional interim updates will be accessible through on the WestMetro HOME Consortium’s webpage at <https://www.newtonma.gov/government/planning/housing-community-development/westmetro-home-consortium>
OR
<https://tinyurl.com/WestMetroHOMEConsortium>
- **Community.** The WestMetro HOME Consortium covers thirteen municipalities. Although these communities share similar affordable housing challenges, they also have quite different patterns of residential development, different market conditions, different social and economic obstacles, and different development constraints. The focus of the HOME-ARP planning process ultimately must focus on qualifying populations and the activities the Consortium can support with HOME-ARP resources.
- **Multiple & Iterative.** There will be multiple opportunities to engage agencies, organizations, and individuals throughout the process.

Resources

The City of Newton has engaged Barrett Planning Group to assist the WestMetro HOME Consortium with developing this plan.

Scale of Engagement

This engagement plan aims to connect existing advocacy and support networks within the Consortium to assess the current needs of people experiencing homelessness or housing instability. Public consultation meetings open to residents of the Consortium will be offered twice during the planning process – once for general consultation and again for the final public hearing. Consultation with members of qualifying populations will require assistance from service providers, and we aim to conduct at least one in-person engagement opportunity geared toward those experiencing housing instability. The engagement process will also include a survey for the general public as well as service providers. Needs for language interpretation and translation will be assessed and addressed as appropriate. The project schedule below outlines our engagement plans in project phases.

Project Schedule and Participation

PHASE I: AUGUST 2022

- Mobilization
- Gather data
- Kick off meeting with City of Newton staff

PHASE II: SEPTEMBER-OCTOBER 2022

- Begin public information process through online platforms and social media.
- Reach out to advocates, community partners, and stakeholders
- Confirm dates for major information and consultation meetings
- Finalize engagement plan
- Initial consultation with WestMetro HOME Consortium: project background
- Interview organizations and agencies responding to the outreach process.
- Specific consultation meetings with advocates and service organizations

PHASE III: OCTOBER-DECEMBER 2022

- Conduct a survey of service providers, public officials, and staff in the Consortium communities, as well as a survey for the general public
- Facilitate three virtual community meetings for the general public and at least one in-person consultation meeting
- Develop Needs Assessment and Gap Analysis
- Follow-up consultation with the WestMetro HOME Consortium, options for programming HOME-ARP funds

PHASE IV: DECEMBER 2022-JANUARY 2023

- Develop programmatic goals
- Draft HOME-ARP Plan preparation
 - Draft recommendations and implementation program
 - Draft plan
 - Public hearing
 - Draft submission for HUD review
 - Response to HUD comments
- Revisions and final plan
- Submission of HOME-ARP Plan

Communications

Information about the HOME-ARP Allocation Plan will be made available primarily through the City of Newton's Office of Housing & Community Development.

The consulting team will create consistent design elements for all PDF and print materials, advertisements, and engagement events. The consulting team will deliver all materials produced to WestMetro HOME Consortium for dissemination throughout Consortium communities.

Messaging

This planning process is defined by the current needs of residents in communities represented in the WestMetro HOME Consortium. An accurate depiction of the regulations for this special one-time program and how HOME ARP may benefit Consortium residents is vital to this project. Outreach opportunities facilitated by the consulting team aim to orient the plan toward an equitable allocation of funds to meet the needs of qualifying populations.

The needs of the homeless, those at risk of homelessness, and vulnerable populations are unique. The consulting team aims to prepare materials to depict personal realities and the need for additional resources. An informational campaign depicting individuals included in the qualifying populations and beneficial programs may alter misconceptions of this planning process and begin community discourse.

ORGANIZATIONS, ADVOCATES, COMMUNITY PARTNERS

The Consortium will aim to consult with the following organizations, advocates, and community partners during the development of this plan. This list is subject to change.

Housing /Homelessness Services & Advocacy

SUMMARY OF WESTMETRO HOME CONSORTIUM HOME-ARP ALLOCATION PLAN SURVEYS

From December 16, 2022 to January 16, 2023, Barrett Planning Group conducted two online surveys to learn about the needs of people facing homelessness in the MetroWest area to inform the WestMetro HOME Consortium's HOME-ARP Allocation Plan. Members of the public could take the online general public survey in English, Portuguese, Spanish, Haitian Creole, Russian, Chinese (Simplified), or Urdu. The Consortium's network of service providers, housing providers, and health care providers, city/town staff, and local officials took a second survey that asked respondents to prioritize needs they see in their professional roles. This summary will describe the results of each of the surveys and their key takeaways.

General Public

There were 204 responses to the general public survey. Three participants provided their responses in Spanish, and all other responses were given in English.

WHO TOOK THE SURVEY?

The survey included demographic questions to provide insight as to whom the survey reached in the community. Among survey takers, the most represented age group was 55-64 years old, and 73.0 percent were women. While 41.3 percent of respondents live in households of two, 19.9 percent have households of three, and households of one and four were about equally common (16.9 percent and 16.4 percent respectively). The majority of survey respondents reported that they were White (77.7 percent), and 10.7 percent preferred not to disclose their race. Fewer than ten respondents were Black (4.6 percent), four were of more than one race (2.0 percent), and three were Asian (1.5 percent). Twelve respondents reported they were Hispanic/Latin(a/o/x).

COMMUNITY HOUSING NEEDS

Of 201 respondents, 70.1 percent have secure housing and own their homes. About 12 percent rent, and about 12 percent have housing with income restrictions. Only 2.5 percent have been homeless in the past, but 6.0 percent report they are worried they could become homeless in the future.

When asked about the most urgent needs in their communities, respondents overwhelmingly indicated (150 out of 191, 78.5 percent) that their communities need more affordable rental

housing. The second most popular answer was that respondents’ communities need more supportive services for people who are, have been, or could become homeless (63 out of 191, 33.0 percent), followed by the need for more emergency shelters (44 out of 191, 23.0 percent). One fifth indicated that there are not enough resources for people transitioning out of homelessness. **Figure A1** illustrates respondents’ selections of most urgent needs. The survey invited participants to select up to five priority items, but there was an average of 2.48 responses per participant.

Figure A1. Most Urgent Community Needs Related to HOME-ARP Eligible Activities

For those who indicated that there was a need for supportive services, there was a follow-up question about the types of supportive services that are most needed respondents’ communities. Each participant was asked to select up to three priorities, and homelessness prevention and case management services were the most common selections (each 44.4 percent). **Figure A2** shows the selections of the 63 survey participants who received this question based on their selections among community needs. About 30 percent of respondents indicated that childcare and life skills training are also priority service needs. Legal services, housing counseling, addiction services, moving costs, rental applications, and other were all selected half as often or less compared to the most popular selections.

Figure A2. Priority Supportive Services Among Survey Respondents

For respondents who indicated that they were currently homeless, had been homeless in the past, or are at risk of homelessness, the survey asked about utilization and overall availability of resources. **Table A1** shows the resources that survey participants have used and needed. While nearly half of these survey-takers have not used homelessness resources, more than half indicated that they have needed rental assistance, but it was not available. Nearly a third were unable to access transitional housing when they needed it.

Table A1. Resources Used and Needed

	Used		Needed but not available	
	#	% (out of 17)	#	% (out of 16)
Down payment assistance (on a mortgage)	2	11.8%	3	18.8%
Emergency shelter for a family	2	11.8%	3	18.8%
Emergency shelter for an individual	1	5.9%	1	6.3%
Mortgage payment assistance	0	0.0%	1	6.3%

APPENDIX C

Table A1. Resources Used and Needed

	Used		Needed but not available	
	#	% (out of 17)	#	% (out of 16)
Other supportive services	4	23.5%	2	12.5%
Permanent supportive housing	1	5.9%	2	12.5%
Rental assistance	4	23.5%	8	50.0%
Resources and facilities for those with disabilities	0	0.0%	1	6.3%
Resources for veterans	0	0.0%	0	0.0%
Resources for victims of domestic violence	4	23.5%	1	6.3%
Transitional housing	2	11.8%	5	31.3%
None/not applicable	7	41.2%	5	31.3%

LOCAL HOUSING ISSUES

Of 202 respondents who answered whether they believe housing discrimination is an issue in their communities, 94 (46.5 percent) said yes, 72 (35.6 percent) were unsure, and 36 (17.8 percent) said no. Of 82 who answered whether they have experienced housing discrimination personally, 17 (20.7 percent) had, and nearly 4 in 5 had not. Of 74 participants who explained why they believe there is housing discrimination in the area, common answers included discrimination based on income, source of income, race, national origin and immigration status, disability status, family status, and gender identity or sexual orientation. Many noted that they believe development patterns and pricing levels in their communities amount to de facto discrimination as well.

When asked what groups of people are at risk of homelessness because their community failed to meet their housing needs, the most common answers were immigrants and refugees (particularly with limited English proficiency), the elderly and people with disabilities on fixed incomes, racial and ethnic minority groups, working people who have low incomes, single mothers, young people/families, LGBTQ populations, and victims of domestic violence. Some also mentioned that low-income households are not the only ones facing housing insecurity within the WestMetro HOME Consortium communities because of very high costs of living, even compared to moderate incomes.

HOME-ARP ALLOCATION

Survey-takers prioritized the eligible activities for HOME-ARP funding according to needs in the Consortium. **Figure A3** shows the overall prioritization of each activity, with preservation and production of rental units that primarily benefit HOME-ARP qualifying populations receiving the most support – nearly 2 of every 3 respondents (65 percent) ranked it either first or second priority. More than half of respondents prioritized tenant-based rental assistance first or second also. Two in three respondents also indicated that operating assistance and capacity building for nonprofits is either last or second-to-last priority.

Figure A3. General Public Funding of HOME-ARP Eligible Activities by Priority Level

Provider Survey

The survey for local service providers, state agencies, and municipal staff and officials received 25 responses. Respondents represented service areas ranging in size from the Greater Boston area, to the MetroWest, to single communities within the Consortium. Twelve service providers/agencies and thirteen local officials or members of municipal staff completed the survey.

LEVELS OF NEED

The survey asked respondents to rank the urgency of needs in their service area. **Figure A4** shows that the rankings from this survey and from the public survey varied slightly, with preservation or production of affordable rental housing still selected as the most urgent need, but with supportive housing-related services at the second most prioritized need, followed by tenant based rental assistance, operating assistance and capacity building for nonprofits, and acquisition and development of non-congregate shelters. In a later question, respondents were asked to prioritize funding for these activities, shown in **Figure A5**.

Figure A4. Service Provider Ranking Priority Needs

All of these needs, however, represent broad categories, so follow-up questions asked about actions that the Consortium could choose to pursue within each eligible activity category. Developing and preserving affordable rental housing is a very urgent need and can have many approaches, so participants were asked to rank needs for: permanent supporting housing, creating new units, rehabilitation of existing units, or other. Thirteen of twenty-five respondents indicated that creating new affordable housing units is the first priority, so its median ranking was one. The median ranking of permanent supportive housing was two, and rehabilitation of existing units was three.

Within supportive services, homelessness prevention was the most prioritized need, followed by case management, mental health services, and housing counseling. All other options received relatively similar levels of support, except for rental applications and moving costs, which were rated as low priority more often.

Regarding the acquisition and development of non-congregate shelter, the clear highest-priority need is in acquiring existing buildings for use as non-congregate shelters. Scattered sites, hotel/motel room conversion, and conversion of existing shelters all shared a median ranking of third priority.

Figure A5 below illustrates survey-takers’ selections for funding priorities, given the needs they identified in previous questions. The chart shows that the most urgent needs and funding priorities do not quite align because tenant-based rental assistance was selected as a first or second priority activity for funding by 60 percent of providers, making it second ranked, rather than third as shown in **Figure A4**.

Figure A5. Service Provider Funding of HOME-ARP Eligible Activities by Priority Level

Providers were asked to identify the three primary barriers that low-income, homeless, and at-risk people face in the MetroWest when they search for housing they can afford. **Figure A6** shows the most common selections among the 25 respondents. Others wrote in barriers including rigidity of income restrictions that jeopardize the program eligibility of people in need, as well as general local resistance to developing affordable housing (NIMBYism). To combat NIMBYism, one respondent suggested public education centered on strategic economic benefits of affordable housing and the vetting and requirements that affordable housing applicants must undertake, which each may alleviate some community concerns.

APPENDIX C

A later question asked respondents about the greatest unmet housing needs in the area, and many responses centered on the availability and accessibility of affordable housing units: there are too few units, the waitlists are too long, and rent affordability levels fail to align with income levels. These answers serve to reinforce the answers shown in **Figure A6**. Other responses discussed the service needs of people facing housing insecurity and how homeless people are given very little support to help them navigate the trauma of homelessness and the challenges of exiting homelessness. These services range from mental health resources to helping people understand affordable housing applications and their requirements.

The greatest unmet needs providers identified related to shelter and to supportive services were asked separately, but all of these answers shared themes. There is a lack of shelters and shelter beds in the area, and in particular, there is a lack of non-congregate shelter where people and families can feel safe. Transportation was identified as a major barrier as well, including a safe and accessible way to get to and from shelter or healthcare facilities. Gaps in mental health and addiction stability resources were also identified, as well as growing challenges associated with finding appropriate care since the COVID-19 pandemic. Others also suggested that housing search assistance is a critical service need.

Figure A6. Primary Barriers to Housing

APPENDIX C

The survey asked respondents about barriers that qualifying populations experience related to housing opportunity and choice. Answers varied, but they primarily focused on the paucity of available units and the requirements of the affordable housing application process itself:

- There are not enough affordable units.
- Waitlists are too long.
- Looking for housing is hard enough, and then there is complicated paperwork, which is hard to navigate and understand.
- Once someone gets past the paperwork and they've applied for a unit, low incomes, poor credit, and prior evictions can disqualify a potential tenant.
- Upfront costs can be a barrier even if someone makes it past all the hurdles associated with finding an affordable unit: they owe first and last month's rent plus a security deposit at move-in.
