Subject: Fix the gas leaks

[DO NOT OPEN links/attachments unless you are sure the content is safe.]

Hello!

Sending a quick note of endorsement for fixing our horrible gas leak problem and not installing any new gas lines in newton.

Since we replaced our gas stove with an induction cooker, our son's asthma immediately got better. We don't need more gas - we need clean air, renewable energy, and to protect the health of our most vulnerable citizens.

Walking the sidewalks of newton, it's not just gross and alarming to walk through a gas cloud every block - it's also horrifying to VISUALLY see the gas bubbling up from the sidewalk on rainy days.

knowing all these non-renewable resources are being completely wasted, it's poisoning our kids as they walk to school and wait for the bus, and it's making newton unlivable.

We have major infrastructure problems and we need to hold the utility companies responsible for repairing the lines we pay them to maintain, not add more lines they will just neglect and pollute our city with.

Thank you
Ashia Ray
