

## Newton Highlands Neighborhood Area Council

April 6, 2023

Dear Director Perez Demorizi,

Thank you for appearing at our meeting last month and reporting on the Levingston Cove project. Since that time, we have received additional inquiries from community members regarding the project, particularly observations that the project seems not to be moving in accordance with the project schedule. This is concerning as weather conditions this Fall and Winter have generally been unusually mild. Therefore, we request an update that would help us understand and explain this situation to the community, including the latest timeline and schedule of construction milestones and expected completion date.

Similarly, we would like to get the latest information about the “Left Beach” work that was discussed at our meeting (timeline, scope, etc.). As indicated, we are looking forward to a widely publicized open public meeting, which would allow the community to provide your department with important discourse and useful design criteria, ensuring a successful design process after a rough start last year.

Best regards,

Jeremy Freudberg, President

On Behalf of the Newton Highlands Neighborhood Area Council
